Natural Resources And Economic Development In Central America A Regional Environmental Profile:

Natural Resources and Economic Development in Central America H. Jeffrey Leonard, 1987-01-01 Natural Resources and Economic Development in Central America Hugh Jeffrey Leonard, 1987 Natural Resources and Economic Development in Central America H. Jeffrey Leonard, International Institute for Environment and Development. Environmental Planning and Management Project, 1985 **Green Guidance for Latin America and the Caribbean** Lori Ann Thrupp, 1993 *Monteverde* Nalini Nadkarni, Nathaniel T. Wheelwright, 2000 The Monteverde Cloud Forest Reserve has captured the attention of biologists conservationists and ecologists and has been the setting for extensive investigation over the past 30 years This provides information on this ecosystem and the biota **Toward an Environmental Strategy for Latin America and the Caribbean** , 1990 **Sustainable Agriculture in Central America** R. Ruben, 1997-07-14 Agricultural development in Central America is based on extensive growth supported by macroeconomic policies that marginalize small peasants Deforestation erosion and resource depletion are particularly severe This book offers a comprehensive review of the perspectives for state policies and local action to enhance sustainable agriculture Macroeconomic conditions and institutional arrangements for the establishment of sustainable production systems in different eco regional settings hillsides humid tropics frontier areas are discussed as well as policy instruments to improve property rights management rules and financial mechanisms to enhance sustainable resource use *El Salvador, Rural Development Study* , 1998 Although El Salvador has recorded impressive overall economic growth in the 1990s during this period agricultural growth has lagged considerably below the rest of the economy which raises concerns about the long run capacity of the sector to raise incomes and employment in rural areas and contribute to overall growth The main objectives of this sector review are twofold to develop a strategy to revitalize the agricultural sector and realize its full potential for efficient and sustainable growth by enhancing competitiveness and to present the main findings of the analysis of rural poverty and develop its implications for the design of a strategy for poverty alleviation Agrarian Policies in Central America W. Pelupessy, R. Ruben, 1999-12-13 Macroeconomic adjustment and sectoral reforms have strongly modified the framework for rural development in Central America This book offers a structural analysis of agrarian policies in Central America and their impact on production conditions and farmers welfare The Caribbean Basin , 1993 **Environmental Change and Security Project Report** , 2002 **Economics, Ecology, and the Roots of Western Faith** Robert R. Gottfried, 1995 Environmentalists have turned to Eastern religion Deep Ecology and Native American religion for alternatives to the Western view that humans should dominate nature In Economics Ecology and the Roots of Western Faith Robert R. Gottfried persuasively demonstrates that the ancient Hebrew worldview found in the Torah and the New Testament is remarkably green Drawing on these insights from ancient Western thought and economic understanding of ecosystems and natural processes Gottfried analyzes the prerequisites for maintaining or improving human welfare and ecological vitality in

terms of land economics and management *Environment Under Fire* Daniel Faber,1993 *International Environmental Affairs* ,1989 **Directory of Country Environmental Studies** ,1993 *Human Activities and the Tropical Rainforest* Bernard K. Maloney,1998 Arising initially from a conference the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way Other books have considered some but not all of these themes however none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself Because of the approach taken this book should appeal across traditional disciplinary boundaries Indeed a prime aim has been to suggest that rainforest because of its complexity and the complexity of people rainforest relationships throughout time deserves study from a broad perspective This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto This book is aimed at geographers physical and human social anthropologists archaeologists pedologists foresters and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest **Agroforestry: Science, Policy and Practice** Fergus L. Sinclair,2013-03-09 Agroforestry research is central to developing methods for the sustainable use of natural renewable resources evolving to address the needs of the coming century It is now necessary to consolidate the scientific gains now being made in process oriented research and to develop a policy framework to encourage the adoption of sustainable land use practices Agroforestry plays an important role in conserving forest resources reducing the need for deforestation Further if forest is broadly defined as tree cover agroforestry will also increase the proportion of woody biomass in farming landscapes The papers selected for inclusion in *Agroforestry Science Policy and Practice* establish agroforestry as an interdisciplinary science focused on the practical imperative of assisting farmers forest dwellers and landscape level planners to achieve sustainable food fuel and timber production into the 21st century **Development Or Destruction** Theodore E. Downing,2019-08-27 This book is the outcome of a workshop on the conversion of tropical forest to pasture in Latin America convened in Oaxaca Mexico in 1988 It examines the dynamics underlying this complex and destructive process and enlisted multiple perspectives in order to identify alternatives **Global Cooperation** Sai Felicia Krishna-Hensel,2017-03-02 The twenty first century global community is confronted with unprecedented challenges as well as unique opportunities The degree to which it can establish and institutionalize norms and mechanisms designed to promote and sustain meaningful global cooperation will determine the future course of civilization This volume brings together a broad range of scholars to highlight some of the areas of contemporary transnational cooperation and to examine the scope and levels at which cooperation can and does take place The study examines the issue of weapons of mass destruction explores the promises of biotechnology and space technology and investigates the roles of global conventions and institutions as strategies for addressing the common threats facing the international system In short the volume raises important timely

issues regarding the challenges and opportunities confronting the global community which both policy makers and academicians will find informative and thought provoking in their efforts to understand the nature and complexity of the twenty first century global community **Tropical Rainforests** Susan E. Place, 2001-05 Presents an overview of the nature of rainforests and discusses the causes and consequences of deforestation in Latin America's rainforests as well as alternative approaches to development
