Natural Obsessions:

Natural Obsessions Natalie Angier, 1999 Describes the search for the genes that control cancer **Natural Obsessions** Natalie Angier, 1999-04-01 As dramatic as *The Double Hex* and as absorbing as *The Soul of a New Machine* *Natural Obsessions* explores the advanced reaches of molecular biology the nature of the human cell and the genes that control cancer It unforgettably portrays some of the best young scientists in the world the rewards and discouragements of scientific research and the very process of scientific inquiry **One in Three** Adam Wishart, 2008-01-21 How close are we to defeating cancer A calming and illuminating blend of memoir and medical history Janet Maslin *The New York Times* When his father was diagnosed with cancer documentary filmmaker Adam Wishart couldn't find a book that clearly answered his most basic questions What was the disease and how did it take hold What is it about cancer's biology that makes it hard to eradicate And most importantly are we on the way to a cure *One in Three* is both a son's personal story and a journalistic take on cancer's history outlining the encouraging story of science's progress in changing the outlook on cancer from a disease we die from to one we live with Covering the discovery of the disease its treatment and its prevention this is a story of both hardship and hope and a helpful companion for anyone dealing with this all too common illness as a patient a loved one or a caregiver An engaging presentation of facts reported with the cool detachment of a professional journalist interspersed with the raw feelings of a son recording the progress of his father's fatal illness what's right and wrong within the medical community and the emotional toll on everyone involved with the father and son's journey Booklist Fascinating *San Francisco Chronicle* Makes abstract science accessible and dignifies a human story with the insights of medicine Andrew Solomon *New York Times* bestselling and National Book Award winning author of *Far from the Tree* Cancer-gate Samuel Epstein, 2019-08-22 Award winning author Samuel S Epstein M D whose 1978 book *The Politics of Cancer* shook the political establishment by showing how the federal government had been corrupted by industrial polluters has written a book that is sure to be of equal consequence *Cancer Gate How to Win the Losing Cancer War* is a groundbreaking new book It warns that contrary to three decades of promises we are losing the winnable war against cancer and that the hand in glove generals of the federal National Cancer Institute NCI and the private nonprofit American Cancer Society ACS have betrayed us These institutions Epstein alleges have spent tens of billions of taxpayer and charity dollars primarily targeting silver bullet cures strategies that have largely failed while virtually ignoring strategies for preventing cancer in the first place As a result cancer rates have escalated to epidemic proportions now striking nearly one in every two men and more than one in every three women This translates into approximately 50 percent more cancer in men and 20 percent more cancer in women over the course of just one generation **Woman** Natalie Angier, 2000 The author explores the essence of what it means to be a woman in body and mind as she shares her thoughts on everything from organs to orgasm and menopause **Tomorrow's Cures Today?** Donald R Forsdyke, 2003-09-02 Discussing the laws in the current research funding decision process the

author suggests ways to improve future funding of health research systems Chapters recount ways of raising funds the tragic way authorities improperly introduced diphtheria immunization consideration of how the peer review system evolved in response to massive infusion of funds in the nineteen forties and the status quo generating a climate conducive to ethics violations among others This fascinating work will be an invaluable tool to researchers health care workers members of government agencies and those in charitable organizations that support health research as well as to anyone interested in current trends in this area including patients

American Women of Science since 1900 Tiffany K. Wayne, 2010-10-11 A comprehensive examination of American women scientists across the sciences throughout the 20th century providing a rich historical context for understanding their achievements and the way they changed the practice of science Much more than a Who's Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole

Stop Breast Cancer Before it Starts Samuel S. Epstein MD, 2013-08-27 With pink buckets of Kentucky Fried Chicken I'm here for the boobies t-shirts and coffee cups and a pink ribbon celebrity dunk tank on The Ellen Degeneres Show a Mardi Gras culture has arisen around a deadly disease over the last decade The highly marketed pink ribbon criticized for being tied to pharmaceutical interests presents breast cancer as normal and pretty in pink Yet the statistics of breast cancer remain the same Expert on the preventative causes of cancer Dr Samuel S Epstein has been watching the debates around breast cancer for more than four decades He asks with all the talk about early detection mammograms improved treatment and the race for the cure why don't we ever hear about breast cancer prevention Dr Epstein knows the substantial research that has directly associated many factors of daily life with the development of the disease The steps that can be taken to prevent it are often amazingly simple but rarely make the headlines Here the evidence is presented and preventative choices are carefully and accessibly outlined In presenting this critical information that all Americans should know about Stop Breast Cancer Before it Starts empowers women to take charge of their health and make a real difference in the fight against cancer

Women's Work Laurel Smith-Doerr, 2004 Women scientists working in small for-profit companies are eight times more likely than their university counterparts to head a research lab Why Laurel Smith-Doerr reveals that contrary to widely held assumptions

strong career opportunities for women and minorities do not depend on the formal policies and long job ladders that large hierarchical bureaucracies provide In fact highly internally linked bio technology firms are far better workplaces for female scientists when compared to university settings or established pharmaceutical companies offering women richer opportunities for career advancement Based on quantitative analyses of more than two thousand life scientists careers and qualitative studies of scientists in eight biotech and university settings Smith Doerr's work shows clearly that the network form of organization rather than fostering old boy networks provides the organizational flexibility that not only stimulates innovation but also aids women's success

Impure Cultures Daniel Lee Kleinman, 2003-10-15 How are the worlds of university biology and commerce blurring Many university leaders see the amalgamation of academic and commercial cultures as crucial to the future vitality of higher education in the United States In *Impure Cultures* Daniel Lee Kleinman questions the effect of this blending on the character of academic science Using data he gathered as an ethnographic observer in a plant pathology lab at the University of Wisconsin Madison Kleinman examines the infinite and inescapable influence of the commercial world on biology in academia today Contrary to much of the existing literature and common policy practices he argues that the direct and explicit relations between university scientists and industrial concerns are not the gravest threat to academic research Rather Kleinman points to the less direct but more deeply rooted effects of commercial factors on the practice of university biology He shows that to truly understand research done at universities today it is first necessary to explore the systematic pervasive and indirect effects of the commercial world on contemporary academic practice

American Astronomy John Lankford, Ricky L. Slavings, 1997-05-15 Focusing on a period that saw fundamental changes in the nature and content of astronomy including the rise of astrophysics Lankford has compiled remarkable data such as the number of people with and without doctorates the number who taught in colleges or universities versus those involved in industrial or government work and the number of women versus men He also addresses the crucial question of power within the community what it meant which astronomers had it and what they did with it

Graft: the devil's diamond John Lamphere, 2012-02-18 The poisoned will and a fog set upon the reaches were a time to war and what may come of the fairer races Dwarven strongholds and through the southern lands of the pixie where all their magic is set an underground kingdom could this be to a single grain of sand The great tree will grow again to a time when men were little and far between and the women left to carry the burden of this war I do not remember when the tree was whole or when it stood so tall but here to see it cleaved at the trunk and its people like the fruit left to rot in the colder sands I don't remember many things as I used to or the way was the color in that little girl's hair yet there she stood waiting for me to know how this all would play out My people this fruit or anything left for this rotten world is man the short ones who live in the east and make money on the backs of the proud native Death has all that is time left to be and this covering is slow to find what we really must become
