**The British Lower Palaeolithic** John McNabb, 2011-03-17 Taking as its central theme the issue of whether early Hominins organized themselves into societies as we understand them John McNabb looks at how modern researchers recognize such archaeological cultures He examines the existence of a stone tool culture called the Clactonian to introduce the multidisciplinary nature of the subject In analyzing the various kinds of data archaeologists would use to investigate the existence of a Palaeolithic culture this book represents the latest research in archaeology population dispersals geology climatology human palaeontology evolutionary psychology environmental and biological disciplines and dating techniques along with many other research methods [The Handbook of British Archaeology](#) Lesley Adkins, Roy Adkins, Victoria Leitch, 2017-04-13 For over 25 years The Handbook of British Archaeology has been the foremost guide to archaeological methods artefacts and monuments providing clear explanations of all specialist terms used by archaeologists This completely revised and updated edition is packed with the latest information and now includes the most recent developments in archaeological science Meticulously researched every section has been extensively updated by a team of experts There are chapters devoted to each of the archaeological periods found in Britain as well as two chapters on techniques and the nature of archaeological remains All the common artefacts types of sites and current theories and methods are covered The growing interest in post medieval and industrial archaeology is fully explored in a brand new section dealing with these crucial periods Hundreds of new illustrations enable instant comparison and identification of objects and monuments from Palaeolithic handaxes to post medieval gravestones Several maps pinpoint the key sites and other features include an extensive bibliography and a detailed index The Handbook of British Archaeology is the most comprehensive resource book available and is essential for anyone with an interest in the subject from field archaeologists and academics to students heritage professionals Time Team followers and amateur enthusiasts *Heritage, Authority and Power* Barbara Wood, 2025-04-23 *Heritage Authority and Power* Understanding Theory Through Practice examines who holds power and authority in heritage the connection with specialist knowledge and what the shifting nature of these attributes means for concepts of authenticity Drawing on interviews with practitioners working across the heritage sector Wood explores why in some organisations staff feel disempowered but in others they thrive In exploring the worked experience of practitioners a new model emerges for understanding the sector that recognises the differences between the activity of heritage and the work of professional practice The model demonstrates that the sector is unknowingly operating with two different purposes The activity of heritage generated by and from the collections of the past is inventive creative and entertaining but operates for contemporary need and interest The work of professional practice meanwhile although itself creative and supporting and enabling the work of heritage is fundamentally concerned with long term collection development research and conservation In recognising and embracing these differences the function of specialist practice in relation to curatorship can be

appreciated but so too can the contribution of supporting specialisms such as education outreach community engagement and design The model presented within the book subsequently offers a more efficient and effective forward looking way to think about funding organising and managing these two areas separately but also in active partnership Heritage Authority and Power is situated in the space between academia and practice and is useful for students practitioners and for anyone interested managing or working in heritage It will be particularly relevant to academics and students engaged in the study of heritage museums tourism and visitor experience and public history *Proceedings of the Prehistoric Society for ...*, 2005

The Bronze Age Landscape of the Northern English Midlands David Mullin, 2003 Wet wooded and largely unattractive is how some have characterised the northern Midlands in the Bronze Age In this thesis David Mullin undertakes an archaeological investigation of the ill studied regions of Cheshire northern Shropshire and northern Staffordshire **The Quaternary of Norfolk & Suffolk** Simon G. Lewis, C. A. Whiteman, R. C. Preece, 2000 Technology in Archaeology Mikkel Sørensen, Pierre Desrosiers, 2008 The aim of Technology in Archaeology is to stress that cultural social and cognitive aspects today are important goals and perspectives of technological studies and that technological studies can contribute vitally to the interpretation of our prehistory The book consists of ten case studies which employ the study of technology as a primary methodology The materials analysed in the studies are made from bone stone and textiles while the archaeological contexts range from Middle Palaeolithic to the Viking Age *Book of Stone Age Britain* Nicholas Barton, 1997 *Ancient Italy in Its Mediterranean Setting* David Ridgway, 2000 *Early Mesolithic Britain* Michael Reynier, 2005 This study looks at Early Mesolithic Britain and in particular the assemblage types known as Star Carr Deepcar and Horsham from the point of view of six independent areas of research typology technology chronology environment settlement and origins The discussions highlight what are considered to be the most relevant results of the analyses and offer one or more interpretations of their meaning for the Early Mesolithic **Interdisciplinary Approaches to the Oldowan** Erella Hovers, David R. Braun, 2009-03-08 An understanding of the uniquely human behavior of stone tool making tackles questions about hominins ability to culturally transmit and expand their base of social and practical knowledge and their cognitive capacities for advanced planning The appearance of stone tools has often been viewed as a threshold event impacting directly and profoundly the later course of cultural and social evolution Alternatively it has been understood as a prelude to significant succeeding changes in behavioral social and biological evolution of hominins This book presents a series of recent enquiries into the technological and adaptive significance of Oldowan stone tools While anchored in a long research tradition these studies rely on recent discoveries and innovative analyses of the archaeological record of ca 2 6 1 0 million years ago in Africa and Eurasia dealing with the earliest lithic industries as manifestations of hominin adaptations and as expressions of hominin cognitive abilities **Flinta i sydvästra Skåne** Bo Knarrström, 2000 *Life and Economy at Early Medieval Flixborough, c. AD 600-1000* D. H. Evans, 2009-08-27 Between 1989 and 1991 excavations in the parish of Flixborough North

Lincolnshire unearthed remains of an Anglo Saxon settlement associated with one of the largest collections of artefacts and animal bones yet found on such a site In an unprecedented occupation sequence from an Anglo Saxon rural settlement six main periods of occupation have been identified dating from the seventh to the early eleventh centuries with a further period of activity between the twelfth and fifteenth centuries AD The remains of approximately forty buildings and other structures were uncovered and due to the survival of large refuse deposits huge quantities of artefacts and faunal remains were encountered compared with most other rural settlements of the period Volume 2 contains detailed presentation of some 10 000 recorded finds over 6 000 sherds of pottery and many other residues and bulk finds illustrated with 213 blocks of figures and 67 plates together with discussion of their significance It presents the most comprehensive and currently unique picture of daily life on a rural settlement of this period in eastern England and is an assemblage of Europe wide significance to Anglo Saxon and early medieval archaeologists *The Knife River Flint Quarries* Stanley A.
