Nature Borders:

Cartographies of Nature Maano Ramutsindela, 2014-06-19 The ascendancy of border studies in the last two decades or so and the burgeoning work on nature and society neither drew attention to ecological theories of borders nor capitalised on nature as a useful avenue through which border research could be advanced This volume fills this void by engaging with the following key questions What insights can be drawn from species borders to broaden understandings of bordering What sorts of borders are engendered by various types of conservation areas What border stories does each of these areas tell us What do conservation related borders teach us about multiple lines that divide societies Answers to these questions help researchers understand a typology of nature related borders The primary objectives of this volume are twofold The first objective is to expand and deepen the links between nature conservation and border studies by bringing species borders into conversation with border studies while at the same time paying attention to diverse conservation areas and conservation practices The second objective is to highlight forms of borders associated with various types of conservation areas and the protection of certain types of natural resources The manner in which nature conservation produces borders and the forms those borders take has the potential to enrich the conceptualisation of borders The point of departure in this volume is that conservation practices produce feedback loops on social reality Authors in the volume variously show that concerns with environmental protection and management offer possibilities for exploring and even disrupting borders within society and those between society and nature Conservation areas in particular are crucial for a meaningful analysis of nature's borders and the discourses and narratives related to them and how such discourses influence conservation practice This volume is an invaluable resource for research and upper level courses on border studies political ecology conservation and biodiversity management and environmental change and social impact

The Nature of Borders Lissa K. Wadewitz, 2012-09-10 Winner of the 2014 Albert Corey Prize from the American Historical Association Winner of the 2013 Hal Rothman Award from the Western History Association Winner of the 2013 John Lyman Book Award in the Naval and Maritime Science and Technology category from the North American Society for Oceanic History For centuries borders have been central to salmon management customs on the Salish Sea but how those borders were drawn has had very different effects on the Northwest salmon fishery Native peoples who fished the Salish Sea which includes Puget Sound in Washington State the Strait of Georgia in British Columbia and the Strait of Juan de Fuca drew social and cultural borders around salmon fishing locations and found ways to administer the resource in a sustainable way Nineteenth century Euro Americans who drew the Anglo American border along the forty ninth parallel took a very different approach and ignored the salmon's patterns and life cycle As the canned salmon industry grew and more people moved into the region class and ethnic relations changed Soon illegal fishing broken contracts and fish piracy were endemic conditions that contributed to rampant overfishing social tensions and international mistrust The Nature of Borders is about the ecological effects of imposing cultural and political borders on this

critical West Coast salmon fishery This transnational history provides an understanding of the modern Pacific salmon crisis and is particularly instructive as salmon conservation practices increasingly approximate those of the pre contact Native past The Nature of Borders reorients borderlands studies toward the Canada U S border and also provides a new view of how borders influenced fishing practices and related management efforts over time Watch the book trailer <http://www.youtube.com/watch?v=7ffLPgtCYHA> feature_channel_video_title

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences

Workers without Borders Ines Wagner, 2018-11-15 How the European Union handles posted workers is a growing issue for a region with borders that really are just lines on a map A 2008 story dissected in Ines Wagner's Workers without Borders about the troubling working conditions of migrant meat and construction workers exposed a distressing dichotomy how could a country with such strong employers associations and trade unions allow for the establishment and maintenance of such a precarious labor market segment Wagner introduces an overlooked piece of the puzzle re regulatory politics at the workplace level She interrogates the position of the posted worker in contemporary European labour markets and the implications of and regulations for this position in industrial relations social policy and justice in Europe Workers without Borders concentrates on how local actors implement European rules and opportunities to analyze the balance of power induced by the EU around policy issues Wagner examines the particularities of posted worker dynamics at the

workplace level in German meatpacking facilities and on construction sites to reveal the problems and promises of European Union governance as regulating social justice Using a bottom up approach through in depth interviews with posted migrant workers and administrators involved in the posting process Workers without Borders shows that strong labor market regulation via independent collective bargaining institutions at the workplace level is crucial to effective labor rights in marginal workplaces Wagner identifies structures of access and denial to labor rights for temporary intra EU migrant workers and the problems contained within this system for the EU more broadly

How Border Peripheries are Changing the Nature of Arab States Maha Yahya,2023-01-01 This book addresses the multiple dimensions of the limited reach or breakdown of central authority in border regions of Arab states and their implications for state sovereignty and modes of governance These include the emergence of illicit networks of exchange the rise of new nonstate actors in border regions including paramilitary or jihadi groups and the transformation of border areas into areas of regional conflict

Collectively the essays in this volume address such processes which have been observable in conflict stricken countries such as Syria Iraq and Yemen and in fragile political or economic contexts like the ones in Lebanon Tunisia and Algeria as well as in relatively stable Emirates such as Kuwait The contributions also shed light on how border peripheries in the Arab world have impacted the center of political and economic power in their states

More Borderlines: 30 Reproducible Borders Dianne Draz,1998 **Transgression as a Rule** Ulrich Best,2007 Whereas currently German Polish relations are marked by irritations the previous phase of politics and discourse from 1990 leading up to the EU accession of Poland was marked by an increasing stress on Europe in both countries This was connected with changing practices of cross border cooperation as well as a change in academic border studies Transgression as a Rule argues that resulting from this cross border cooperation has become a rule The actors negotiate new contradictory spaces for their actions supported by the state but partly uncomfortable with it drawing on the powerful discourse of cooperation and trying to escape from it Their practices can also inform the practices of border studies

We Don't Get It! Frank J. Regan,2005 Border Identities Thomas M. Wilson,Hastings Donnan,1998-01-22 This book offers fresh insights into the complex and various ways in which international frontiers influence cultural identities Ten anthropological case studies describe specific international borders in Europe Asia Africa and North America and bring out the importance of boundary politics and the diverse forms that it may take As a contribution to the wider theoretical debates about nationalism transnationalism and globalization it will interest to students and scholars in anthropology political science international studies and modern history

Interspecies Politics Rafi Youatt,2020-02-25 Politics with the environment Eight Lectures on Miracles James Bowling Mozley,1865 Post-Cold War Borders Jussi Laine,Ilkka Liikanen,James W. Scott,2018-09-24 In the aftermath of the Ukraine crises borders within the wider post Cold War and post Soviet context have become a key issue for international relations and public political debate These borders are frequently viewed in terms of military preparedness and confrontation but behind armed territorial

conflicts there has been a broader shift in the regional balance of power and sovereignty This book explores border conflicts in the EU's eastern neighbourhood via a detailed focus on state power and sovereignty set in the context of post Cold war politics and international relations By identifying changing definitions of sovereignty and political space the authors highlight competing strategies of legitimising and challenging borders that have emerged as a result of geopolitical transformations of the last three decades This book uses comparative studies to examine country specific variation in border negotiation and conflict and pays close attention to shifts in political debates that have taken place between the end of State Socialism the collapse of the Soviet Union and the outbreak of the Ukraine crises From this angle Post Cold War Borders sheds new light on change and variation in the political rhetoric of the EU the Russian Federation Ukraine and neighbouring EU member countries Ultimately the book aims to provide a new interpretation of changes in international order and how they relate to shifting concepts of sovereignty and territoriality in post Cold war Europe Shedding new light on negotiation and conflict over post Soviet borders this book will be of interest to students researchers and policy makers in the fields of Russian and East European studies international relations geography border studies and politics

EurAfrican Borders and Migration Management Paolo Gaibazzi, Stephan Dünwald, Alice Bellagamba, 2016-10-25 This volume traces the African ramifications of Europe's southern border While the Mediterranean Sea has become the main stage for the current play and tragedy between European borders and African migrants Europe's southern border has also been offshored to Africa mainly through cooperation agreements with countries of transit and origin By bringing into conversation case studies from different countries and disciplines this volume seeks to open a window on the backstage of this externalization of borders It casts light on the sites from consulates to open seas and deserts in which Europe's southern border is made and unmade as an African reality yielding what the editors call EurAfrican borders It further describes the multiple actors state agents migrants smugglers activists etc that variously imagine construct cross or contest these borders and situates their encounters within the history of uneven exchanges between Africa and Europe

Deleuze, Guattari, and the Problem of Transdisciplinarity Guillaume Collett, 2019-11-14 Deleuze and Guattari's work has today become ubiquitous in the humanities and social sciences being regularly drawn on by a vast array of subjects Throughout their careers Deleuze and Guattari also engaged with a myriad of disciplines yet they declared themselves that Philosophy is not interdisciplinary This apparent contradiction has rarely been explicitly confronted by scholars Fortunately however Deleuze and Guattari left us a number of clues in their works signaling how to approach this apparent impasse These clues amount to a complex and penetrating if un unified theory of disciplinarity and cross disciplinary articulation Energized by recent developments in critical transdisciplinarity studies this volume analyzes and evaluates instances of disciplinarity and transdisciplinarity within Deleuze and Guattari's shared and respective bodies of work The first volume in English specifically devoted to examining Deleuze and Guattari's work using this framework this book both contributes to the field of critical transdisciplinarity studies and in doing so helps shed

light on the heart of Deleuze and Guattari's intellectual project

Physical and Symbolic Borders and Boundaries and How They Unfold in Space Basak Tanulku, Simone Pekelsma, 2024-03-05 This book critically examines how borders and boundaries physical and symbolic unfold in different geographies and spaces It aims to understand why they exist and how they are constructed deconstructed and reconstructed The book explores why certain borders boundaries persist while others are removed and new ones are erected It does not focus on one form of border boundary or geographic location It shifts its attention to different geographies borders and boundaries It also focuses on intersections between them and how they complete each other The book provides case studies from the past and present allowing readers to connect subjects periods and geographies The chapters address classical subjects such as nation states and tackle novel questions such as ownership against access that is of urban infrastructures COVID 19 and lockdowns and the divides within digital worlds The book benefits from visual essays that complement the theoretical and empirical chapters showing the complexity of the phenomenon in a simple and effective way The book will be of interest to academics researchers and students working in the fields of urban and rural studies urban sociology cities and communities urban and regional planning urban anthropology political sciences and migration studies human geography cultural geography urban anthropology and visual arts

Centering Borders in Latin American and South Asian Contexts Debaroti Chakraborty, Debra A. Castillo, Kavita Panjabi, 2022-07-18 This book presents inter disciplinary research on contemporary borders with contributions from scholars and cultural practitioners located in different contexts in the Americas and South Asia There has been significant sociological work on borders however there is a relative dearth of humanities research on contemporary border realities particularly in South Asia This volume introduces frameworks of critical insights and knowledge on border narratives and cultural productions It addresses and goes beyond the impact of the partition in South Asia to train a unique comparative and aesthetic lens on borders and borderlands in relation to Latin America and the U S A through oral narratives photographs objects films theatre journals and songs It maps border perspectives and their reception in a framework of cultural politics It revolves around themes such as violence and modes of survival women's narratives of migration trafficking and incarceration abduction of children vulnerability as experience rationalities of mass killings and proliferation of countercultures to map border perspectives in a framework of cultural politics First of its kind the volume will be useful to scholars and researchers of comparative literary and cultural studies South Asian studies Latin American studies border studies arts and aesthetics visual studies sociology comparative politics international relations and peace and conflict resolution studies

A Companion to Border Studies Thomas M. Wilson, Hastings Donnan, 2016-01-19 A Companion to Border Studies Taking into consideration all aspects this book has a very important role in the professional literature of border studies Cross Border Review Yearbook of the European Institute Summing Up Highly recommended Upper division undergraduates and above Choice This book with its interdisciplinary team of authors from many world regions shows the state of the art in this

research field admirably Ulf Hannerz Stockholm University This volume will be the definitive work on borders and border related processes for years into the future The editors have done an outstanding job of identifying key themes and of assembling influential scholars to address these themes David Nugent Emory University This urgently needed Companion edited by two leading figures of border studies reflects past insights and showcases new directions a must read for understanding territory power and the state Dr Nick Vaughan Williams University of Warwick This impressive collection will have a broad appeal beyond specialist border studies Anyone with an interest in the nation state nationalism ethnicity political geography or indeed the whole historical project of the modern world system will want to have access to a copy The substantive scope is global and the intellectual reach deep and wide Simply indispensable Richard Jenkins University of Sheffield Dramatic growth in the number of international borders has coincided in recent years with greater mobility than ever before of goods people and ideas As a result interest in borders as a focus of academic study has developed into a dynamic multi disciplinary field embracing perspectives from anthropology development studies geography history political science and sociology Authors provide a comprehensive examination of key characteristics of borders and frontiers including cross border cooperation security and controls migration and population displacements hybridity and transnationalism A Companion to Border Studies brings together these disciplines and viewpoints through the writing of an international collection of preeminent border scholars Drawing on research from Africa Asia the Middle East Europe and the Americas the contributors argue that the future of Border Studies lies within such diverse collaborations which approach comparatively the features of borders worldwide

The Social Ecology of Border Landscapes Anna Grichting, Michele Zebich-Knos, 2017-05-02 The collection of essays in *The Social Ecology of Border Landscapes* defines borders and borderlands to include territorial interfaces marginal spaces physical sociological and psychological and human consciousness From theoretical and conceptual presentations on social ecology and its agencies and representations to case studies and concrete projects and initiatives the contributing authors uncover a thread of contemporary thought and action on this important emerging field The essays aim to define the territories of social ecology to investigate how social agencies can activate ecological processes and systems and to understand how the interactions of people and ecosystems can create new sustainable landscapes across tangible and intangible territorial rifts

All the Same - All Being New Peter Herrmann, 2011 The book gathers different contributions they can all be linked to recent orientations by the main contributor Paul Boccara who states the need for a new model anthropologique According to the work of the well known French academic and political activist the current challenges need more than a simple change of the economic system even if such reorientation is surely also needed and has to be in itself far reaching However going beyond economic changes the challenge of the time has to face the need to redefine the position and role of humanity in the wider relationship to others and to nature The contributions gathered in the present volume are discussing both generic questions of such revolutionary

processes and the need of changes in concrete areas as labour market policies political strategies financial control and the like

Liminality, Transgression and Space Across the World Basak Tanulku, Simone Pekelsma, 2024-03-05 This book analyses various forms of liminality and transgression in different geographies and demonstrates how and why various physical and symbolic boundaries create liminality and transgression Its focus is on comprehending the ways in which these borders and boundaries generate liminality and transgression rather than viewing them solely as issues It provides case studies from the past and present allowing readers to connect subjects periods and geographies It consists of theoretical and empirical chapters that demonstrate how borders and liminality are interconnected The book also benefits from the power of several visual essays by artists to complete the theoretical and empirical chapters which demonstrate different forms of liminality without need of much words The book will be of interest to researchers and students working in the fields of urban and rural studies urban sociology cities and communities urban and regional planning urban anthropology political science migration studies human geography cultural geography urban anthropology and visual arts

Nature Borders Introduction

In the digital age, access to information has become easier than ever before. The ability to download Nature Borders has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Nature Borders has opened up a world of possibilities. Downloading Nature Borders provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Nature Borders has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Nature Borders. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Nature Borders. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Nature Borders, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Nature Borders has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
