Nature, Human Nature, and Society Paul Heyer, 1982-09-29 **History and Evolution** Matthew H. Nitecki, Doris V. Nitecki, 1992-07-01 The studies of evolutionary biology and of human history face the same kinds of problems and deal with the same processes Both disciplines deal with similar questions in similar ways but do the methods used produce comparable knowledge and are the differences and similarities between these disciplines real This book examines the philosophy of historical and evolutionary studies the objectivity and meanings of human and evolutionary histories the evolutionary approaches to and the analysis of history historical approaches and utilization of evolution the logic of historical and evolutionary thinking and explanations the identification of similarities differences and common problems of evolutionary biology and history and what constitutes the major historical and evolutionary events In Search of Human Nature Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America's most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race *Neither Black Nor White* which won the Pulitzer Prize women's studies *At Odds* which Betty Friedan called a stunning book *Southern history The Other South the New Deal* and many other subjects Now in *The Search for Human Nature* Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years The idea of a biological root to human nature was almost universally accepted at the turn of the century Degler points out then all but vanished from social thought only to reappear in the last four decades Degler traces the early history of this idea from Darwin's argument that our moral and emotional life evolved from animals just as our human shape did to William James's emphasis on instinct in human behavior then seen as a fundamental insight of psychology We also see the many applications of biology from racism sexism and Social Darwinism to the rise of intelligence testing the eugenics movement and the practice of involuntary sterilization of criminals a public policy pioneered in America which had sterilization laws 25 years before Nazi Germany one such law was upheld by Oliver Wendell Holmes's Supreme Court Degler then examines the work of those who denied any role for biology who thought culture shaped human nature a group ranging from Franz Boas Ruth Benedict and Margaret Mead to John B Watson and B F Skinner Equally important he examines the forces behind this fundamental shift in a scientific paradigm arguing that ideological reasons especially the struggle against racism and sexism in America led to this change in scientific thinking Finally Degler considers the revival of Darwinism without the Social Darwinism racism and sexism led first by ethologists such as Karl von Frisch Nikolaas Tinbergen Konrad Lorenz and Jane Goodall who revealed clear parallels between animal and human behavior and followed in varying degrees by such figures as Melvin Konner Alice Rossi Jerome Kagan and Edward O Wilson as well as others in anthropology political science sociology and economics What kind of animal is Homo sapiens

and how did we come to be this way In this wide ranging history Carl Degler traces our attempts over the last century to answer these questions In doing so he has produced a volume that will fascinate anyone curious about the nature of human beings

Humanity and Nature in Economic Thought Gábor Bíró,2021-11-29 Humanity and Nature in Economic Thought Searching for the Organic Origins of the Economy argues that organic elements seen as incompatible with rational homo economicus have been left out of or downplayed in mainstream histories of economic thought The chapters show that organic aspects that is aspects related to sensitive cognitive or social human qualities were present in the economic ideas of a wide range of important thinkers including Hume Smith Malthus Mill Marshall Keynes Hayek and the Polanyi brothers Moreover the contributors to this thought provoking volume reveal in turn that these aspects were crucial to how these key figures thought about the economy This stimulating collection of essays will be of interest to advanced students and scholars of the history of economic thought economic philosophy heterodox economics moral philosophy and intellectual history

Nature and History Ignazio Masulli,2019-06-07 Originally published in 1990 Nature and History examines how Darwin s theory of evolution has been expanded by scholars and researchers to include virtually every scientific discipline The book presents a morphological analysis of historical and social sciences sciences which have traditionally have been viewed as too random in their progressions to conform to a model Through the evaluation of empirical and factual evidence the book builds a case for an evolutionary paradigm which encompasses both natural and social sciences and presents the form s adaptiveness in working historical models

The Return of Nature John Bellamy Foster,2021-06-01 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster s Marx s Ecology Materialism and Nature introduced a new understanding of Karl Marx s revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today s unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs

Philosophy, Humanity and Ecology J. Odera Oruka,1996

Marx's Critical/Dialectical Procedure (RLE Marxism) H.T. Wilson,2015-04-17 This book first published in 1991 demonstrates that Marx is the legitimate founder of what was to become

the critical theory of society It argues that in order to justify a new conception of humans as collective cultural and historical beings Marx undertook a radical critique of the theoretical analytical method of his predecessors and his contemporaries in political economy philosophy and the natural sciences While elements of the methods of some of these thinkers most conspicuously from the work of Aristotle Kant and Hegel were present in Marx's thought he achieved a new synthesis of procedural epistemological and ontological methods

A Redder Shade of Green Ian Angus, 2017-06-22 A socialist response to the looming ecological crisis As the Anthropocene advances people across the red green political spectrum seek to understand and halt our deepening ecological crisis Environmentalists scientists and eco socialists share concerns about the misuse and overuse of natural resources but often differ on explanations and solutions Some blame environmental disasters on overpopulation Others wonder if Darwin's evolutionary theories disprove Marx's revolutionary views or if capitalist history contradicts Anthropocene science Some ask if all this worry about climate change and the ecosystem might lead to a catastrophism that weakens efforts to heal the planet Ian Angus responds to these concerns in *A Redder Shade of Green* with a fresh insightful clarity bringing socialist values to science and scientific rigor to socialism He challenges not only mainstream green thought but also radicals who misuse or misrepresent environmental science Angus's argument that confronting environmental destruction requires both cutting edge scientific research and a Marxist understanding of capitalism makes this book an essential resource in the fight to prevent environmental destruction in the 21st century

Philosophy after Marx Christoph Henning, 2014-04-17 Christoph Henning writes a concise history of misreadings of Marx in the 20th century Focussing on German philosophy from Heidegger to Habermas he also addresses the influence of Rawls and Neopragmatism subsequently scrutinizing a previous history of Marx interpretations that had served as the premises upon which these later works were based Henning sketches a historical trajectory in which a theory of socialist politics enters the fields of economics sociology critical theory and theology before finally overloaded with intellectually dead freight entering into philosophy In so doing he takes a hermeneutic approach to how misreadings in a specific field proliferate into further misreadings across a variety of fields leading to an accumulation of questionable preconceptions With the recent resurgence of interest in Marx Henning's historical recursions make evident where and how academic Anti Marxism had previously got it wrong English translation of *Philosophie nach Marx 100 Jahre Marxrezeption und die normative Sozialphilosophie der Gegenwart in der Kritik* Transcript Verlag Bielefeld 2005

Karl Marx, Anthropologist Thomas C. Patterson, 2009-04-01 After being widely rejected in the late 20th century the work of Karl Marx is now being reassessed by many theorists and activists *Karl Marx Anthropologist* explores how this most influential of modern thinkers is still highly relevant for Anthropology today Marx was profoundly influenced by critical Enlightenment thought He believed that humans were social individuals that simultaneously satisfied and forged their needs in the contexts of historically particular social relations and created cultures Marx continually refined the empirical philosophical and practical dimensions

of his anthropology throughout his lifetime Assessing key concepts from the differences between class based and classless societies to the roles of exploitation alienation and domination in the making of social individuals Karl Marx Anthropologist is an essential guide to Marx's anthropological thought for the 21st century *Marx's Ghost* Thomas C. Patterson, 2020-08-06

How did our current society come into being and how is it similar to as well as different from its predecessors These key questions have transfixed archaeologists anthropologists and historians for decades and strike at the very heart of intellectual debate across a wide range of disciplines Yet scant attention has been given to the key thinkers and theoretical traditions that have shaped these debates and the conclusions to which they have given rise This pioneering book explores the profound influence of one such thinker Karl Marx on the course of twentieth century archaeology Patterson reveals how Australian archaeologist V Gordon Childe in the late 1920s was the first to synthesize discourses from archaeologists sociologists and Marxists to produce a corpus of provocative ideas He analyzes how these ideas were received and rejected and moves on to consider such important developments as the emergence of a new archaeology in the 1960s and an explicitly Marxist strand of archaeology in the 1970s Specific attention is given to the discussion arenas of the 1990s where archaeologists of differing theoretical perspectives debated issues of historic specificity social transformation and inter regional interaction How did the debates in the 1990s pave the way for historical archaeologists to investigate the interconnections of class gender ethnicity and race In what ways did archaeologists make use of Marxist concepts such as contradiction and exploitation and how did they apply Marxist analytical categories to their work How did varying theoretical groups critique one another and how did they overturn or build upon past generational theories Marx's Ghost Conversations with Archaeologists provides an accessible guide to the theoretical arguments that have influenced the development of Anglophone archaeology from the 1930s onwards It will prove to be indispensable for archaeologists historians anthropologists and social and cultural theor

Evolutionism and Its Critics Stephen K. Sanderson, 2015-12-03 Evolutionism and Its Critics is a critical history of evolutionary theories in the social sciences and a defense of them against their many critics Sanderson deconstructs not only the wide array of social evolutionary theories but the criticisms of the antievolutionists Deconstructing evolutionary theories means laying bare their fundamental epistemological methodological conceptual and theoretical assumptions and principles Deconstructing antievolutionism means showing just where and how the critics have for the most part gone wrong But Evolutionism and Its Critics aims to reconstruct as well as deconstruct and does this by building on the shoulders of past giants of evolutionary theorizing a comprehensive evolutionary interpretation of human society based on abundant scientific and historical evidence *A Genealogy of the Good and Critique of Hubris* Phillip Dybicz, 2023 In the first postmodern genealogical history of social work this book identifies common practices of a particular era to inform the description of a cultural and philosophical framework that allows the reader to step inside the shoes of people from that era and understand the practices through their eyes These insights are then utilized to promote

moral reflection of current practices of social welfare and hopefully avoid moral lapses that may arise from our present biases of understanding The Poverty of Animals Mehmet Kanatli,2022-12-09 This book makes a theoretical contribution to animal rights issues from a Marxist perspective Drawing on ethics politics and philosophy it focuses on how to create a social formation that will improve animal welfare Further the book enables the readers to grasp current theoretical debates on animal welfare and to gain insight into theoretical and practical perspectives in dealing with the animal issues The volume will be of great interest to scholars of politics and political philosophy especially Marxism and animal rights activists **Red Dynamite** Carl R. Weinberg,2021-10-15 In Red Dynamite Carl R Weinberg argues that creationism s tenacious hold on American public life depended on culture war politics inextricably embedded in religion Many Christian conservatives were convinced that evolutionary thought promoted immoral and even bestial social sexual and political behavior The fruits of subscribing to Darwinism were in their minds a dangerous rearrangement of God given standards and the unsettling of traditional hierarchies of power Despite claiming to focus exclusively on science and religion creationists were practicing politics Their anticommunist campaign often infused with conspiracy theory gained power from the fact that the Marxist founders the early Bolshevik leaders and their American allies were staunch evolutionists Using the Scopes Monkey Trial as a starting point Red Dynamite traces the politically explosive union of Darwinism and communism over the next century Across those years social evolution was the primary target of creationists and their ideas have consequences strategy instilled fear that shaped the contours of America s culture wars By taking the anticommunist arguments of creationists seriously Weinberg reveals a neglected dimension of antievolutionism and illuminates a source of the creationist movement s continuing strength Thanks to generous funding from Indiana University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories Practical Ecocriticism Glen A. Transforming Leadership James MacGregor Burns,2007-12-01 The New York Times bestselling author and Pulitzer Prize winner examines the history of leadership and the crucial role of leaders in a healthy democracy In Transforming Leadership James MacGregor Burns illuminates the evolution of leadership structures from the chieftains of tribal African societies through Europe s absolute monarchies to the blossoming of the Enlightenment s ideals of liberty and happiness during the American Revolution Along the way he looks at key breakthroughs in leadership and the towering leaders who attempted to transform their worlds Elizabeth I Washington Jefferson Gandhi Eleanor Roosevelt Gorbachev and others Culminating in a bold and innovative plan to address the greatest global leadership challenge of the twenty first century the long intractable problem of global poverty Transforming Leadership will spark lively discussion in classrooms and boardrooms throughout the country *Marx and the Common* Luca Basso,2015-09-29 In Marx and the Common Luca Basso provides a detailed reconstruction of the late Marx s connection of the collective dimension of communism and the element of individual

realisation Through an original analysis of a vast range of Marx's writings from Capital to his political texts and scientific notes the author brings out an articulated historical theoretical landscape in which the notion of individual is intertwined with the ideas of class society and community Rooting his analysis in the revolutionary power of the workers acting in common Basso brings to the fore an anthropological dynamic in Marx irreducible to either liberal individualism or any kind of organicist approach **Marx's Ecology** John Bellamy Foster, 2000-03 By reconstructing a materialist conception of nature and society Marx's Ecology challenges the spiritualism prevalent in the modern Green movement pointing toward a method that offers more lasting sustainable solutions to the ecological crisis
