A Psychoanalytic and Neuroscientific Perspective. How aggression shapes the
mind and drives conflict.

Nature Of Human Aggression

Graham Charles Kinloch, Raj P. Mohan

Nature Of Human Aggression:

The nature of human aggression Ashley Montagu, 1973 *The Nature of Human Aggression and Implications for Eliminating Violence and War* Michael C. Schmidt, 1990 Research Opportunities on the Nature of Human Aggression Thomas Richard Currier, 1975 **Handbook of Aggressive and Destructive Behavior in Psychiatric Patients** Robert T. Ammerman, Michel Hersen, L.A. Sisson, 2012-12-06

Scarcely a day passes without the media detailing some form of human aggression whether it be on its grandest scale in the form of war random bombings and shootings in the streets torture in a prison camp murder by gangs wife abuse resulting in the murder of the husband or the physical abuse of children sometimes resulting in their death Frequently perpetrators of human aggression when arrested and tried in court resort to a psychiatric defense But are all such aggressors indeed appropriately psychiatric patients And if so what are their particular diagnoses and how do these relate to aggression Also of concern is aggression directed against self as evidenced in the rising incidence of suicide among young people or the self mutilation of patients suffering from certain personality disorders Both violence directed outward and aggression toward oneself pose considerable challenges to clinical management whether in the therapist's office or in the inpatient unit Although we have not been able to find successful deterrents to aggression a sizeable body of evidence does exist certainly of a descriptive nature Such data for psychiatric patients are scattered however and can be found in literatures as diverse as the biological ethological epidemiological legal philosophical psychological psychiatric and criminological Therefore given the increased frequency with which mental health professionals encounter cases of violence in their day to day work we believed it important that existing data be adduced in one comprehensive volume *Psychology of Non-violence and Aggression* V.K. Kool, 2007-11-27 Kool draws on recent research to illustrate that whilst the control of violence is a reaction to aggression nonviolence is by contrast an active behaviour The book explores a wide survey of theories and examples spanning ideas in cognition motivation and behaviour that will provide students with an engaging entry point to the subject *The Routledge International Handbook of Human Aggression* Jane Ireland, Philip Birch, Carol Ireland, 2018-01-03 Drawing upon international expertise and including some of the most well known academics and practitioners in the field The Routledge International Handbook of Human Aggression is the first reference work to fully capture how our understanding of aggression has been refined and reconceptualised in recent years Divided into five sections the handbook covers some of the most interesting and timely topics within human aggression research with analysis of both indirect and direct forms of aggression and including chapters on sexual aggression workplace bullying animal abuse gang violence and female aggression It recognises that in many cases aggression is an adaptive choice rather than a moral choice Providing practitioners and academics with an up to date resource that covers broad areas of interest and application the book will be essential reading for students researchers and practitioners associated with a range of social science disciplines including psychology criminology social work and sociology particularly those with an interest in

developmental organisational forensic and criminal justice allied disciplines **War in Human Civilization** Azar

Gat, 2008-03-26 Why do people go to war Is it rooted in human nature or is it a late cultural invention How does war relate to the other fundamental developments in the history of human civilization And what of war today is it a declining phenomenon or simply changing its shape In this truly global study of war and civilization Azar Gat sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history from the early hunter gatherers right through to the unconventional terrorism of the twenty first century In the process the book generates an astonishing wealth of original and fascinating insights on all major aspects of humankind s remarkable journey through the ages engaging a wide range of disciplines from anthropology and evolutionary psychology to sociology and political science Written with remarkable verve and clarity and wholly free from jargon it will be of interest to anyone who has ever pondered the puzzle of war Encyclopedia of Violence, Peace, and Conflict , 2008-09-05

The 2nd edition of Encyclopedia of Violence Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life Building on the highly regarded 1st edition 1999 and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change Covering topics as diverse as Arms Control Peace Movements Child Abuse Folklore Terrorism and Political Assassinations the Encyclopedia comprehensively addresses an extensive information area in 225 multi disciplinary cross referenced and authoritatively authored articles In his Preface to the 1st edition Editor in Chief Lester Kurtz wrote The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully Instead we have increased the lethality of our combat through revolutions in weapons technology and military training The Encyclopedia of Violence Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena Ten years on the need for an authoritative and cross disciplinary approach to the great issues of violence and peace seems greater than ever More than 200 authoritative multidisciplinary articles in a 3 volume set Many brand new articles alongside revised and updated content from the First Edition Article outline and glossary of key terms at the beginning of each article Entries arranged alphabetically for easy access Articles written by more than 200 eminent contributors from around the world **From Pain**

to Violence Felicity de Zulueta, 2006-05-01 Violence is all around us yet despite its widespread prevalence we remain unclear about its causes In this book Felicity de Zulueta begins by defining violence as distinct from aggression and then attempts to trace its origins highlighting the polarization between those who believe mankind to be innately violent and those who see violence as the outcome of man s life experiences As a result of her investigations the author suggests that the

current high level of violence may well be linked to the effects of childhood and adult trauma which appear to be far more widespread than has hitherto been acknowledged These findings are relevant to understanding why normal people can become violent in certain conditions This is a second edition and has been fully updated A new chapter on terrorism has been added *The Encyclopedia of Theoretical Criminology*, 2014-04-07 The Encyclopedia of Theoretical Criminology in zwei Bänden ist zweifelsohne das aktuellste Referenzwerk der theoretischen Kriminologie Fachlich geprägte Beiträge internationaler Experten machen den Leser mit wegweisenden Theorien Konzepten und Schlüsselfiguren vertraut Das Nachschlagewerk präsentiert klassische und zeitgenössische Themen zu den wichtigen Straftatbeständen Zusammenhängen fachspezifische Soziologie Biologie und Psychologie und fachübergreifende Erklärungen zu Kriminalität Kriminalitätsrate und Fragestellungen aus der Rechtssoziologie **The Oxford Handbook of the Human Essence** Martijn van Zomeren, John F. Dovidio, 2018 Oxford Handbooks offer authoritative and up to date reviews of original research in a particular subject area Specially commissioned chapters from leading figures in the discipline give critical examinations of the progress and direction of debates as well as a foundation for future research Oxford Handbooks provide scholars and graduate students with compelling new perspective upon a wide range of subjects in the humanities social sciences and sciences Book jacket [The Routledge Handbook of Dehumanization](#) Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy *Conflict Mediation Across Cultures* David W. Augsburger, 1992-01-01 Believing not only that conflict is inevitable in

human life but that it is essential and can be quite constructive Augsburger proposes a shift to an international approach in resolving conflict Augsburger focuses on interpersonal and group conflicts and provides a comparison of conflict patterns within and among various cultures

Unlocking the Nature of Human Aggression Adrian Perkel, 2023-12-12 *Unlocking the Nature of Human Aggression* is a neuropsychanalytic and scientific exploration of aggression and argues for its central role in psychopathology and the genesis of individual symptoms as well as in broader systemic conflicts and violence Adrian Perkel creates a unique theoretical approach to the various manifestations we encounter of individual group and geo political aggression and destructiveness Based on psychoanalytic investigations of this dynamic and Freud's incomplete exploration of this human drive this book seeks to understand the science of aggression that Freud himself suggested would be possible with time and scientific development Perkel investigates the commonplace inversion of the perpetrator and victim narratives navigating through the complexity of how the aggressive drive often driven by feelings aimed at homeostatic regulation challenges the perception of any objective view of who is perpetrator and who victim He includes his own personal experiences of South African Apartheid as well as historical and contemporary data such as speeches from historical figures during times of war including the Second World War and the Ukrainian Russian conflict Offering a fresh and innovative insight into the nature of this paradoxical drive in humans this book integrates the psychology psychodynamics and neuroscience of modern research into a coherent exposition of this key aspect of psychic functioning in humans It is an essential read for analysts in practice and training psychologists and other mental health professionals and students looking for a modernised theoretical model of the destructive and aggressive drive of the psyche to facilitate better interventions for individual and couple patients and for interventions at systemic and organisational levels

Communicating Aggression in a Megamedia World Beata Sierocka, 2021-03-22 This book describes how in the era of megamedia culture aggression in communication constitutes a threat to the communication community Based on the theoretical incorporation of transcendental pragmatics the book explores how conceptualizing the phenomena of megamedia aggression from this perspective and diagnosing their destructive force are essential for postulating the need for constructing a theory of media communication closely related to the model of discursive rationality giving this theory a critical and normative character and embedding it in the perspective of the project of social co responsibility and in the plan for an ethics of co responsibility Combining key elements of media theory the philosophy of communication the concept of normative ethics and the fields of social psychology and social anthropology this book will be of great interest to scholars and students in the areas of communication studies philosophy anthropology psychology and psychoanalysis

Dominance and Aggression in Humans and Other Animals Henry R. Hermann, 2017-01-05 *Dominance and Aggression in Humans and Other Animals* The Great Game of Life examines human nature and the influence of evolution genetics chemistry nurture and the sociopolitical environment as a way of understanding how and why humans behave in aggressive and dominant ways The book walks us

through aggression in other social species compares and contrasts human behavior to other animals and then explores specific human behaviors like bullying abuse territoriality murder and war The book examines both individual and group aggression in different environments including work school and the home It explores common stressors triggering aggressive behaviors and how individual personalities can be vulnerable to or resistant to these stressors The book closes with an exploration of the cumulative impact of human aggression and dominance on the natural world Reviews the influence of evolution genetics biochemistry and nurture on aggression Explores aggression in multiple species including insects fish reptiles birds and mammals Compares human and animal aggressive and dominant behavior Examines bullying abuse territoriality murder and war Includes nonaggressive behavior in displays of respect and tolerance Highlights aggression triggers from drugs to stress Discusses individual and group behavior including organizations and nations Probes dominance and aggression in religion and politics Translates the impact of human behavior over time on the natural world

Critique of the Empiricist Explanation of Morality C. W. Maris, 2013-11-22 a Two things fill the mind with ever new and increasing admiration and awe the oftener and the more steadily we reflect on them the starry heavens above and the moral law within Thus Kant formulates his attitude to morality Critique of Practical Reason p 260 He draws a sharp distinction between these two objects of admiration The starry sky he writes represents my relationship to the natural empirical world Moral law on the other hand is of a completely different order It begins from my invisible self my personality and exhibits me in a world which has true infinity but which is traceable only by the understanding and with which I discern that I am not in a merely contingent but in a universal and necessary connection p 260 So Kant sees morality as a separate metaphysical order opposed to the world of empirical phenomena Human beings belong to both worlds According to Kant the personality derives nothing of value from its relationship with the empirical world His part in the sensuous world of nature places man on a level with any animal which before long must give back to the rest of nature the substances of which it is made

Genocide Graham Charles Kinloch, Raj P. Mohan, 2005 Twenty authors analyze factors behind genocidal situations worldwide with detailed case studies and an evaluation of attempts to prevent genocide and of the implications for human rights policies with a particular concern to develop new and practical insights Provided by publisher

International Handbook of Violence Research Wilhelm Heitmeyer, John Hagan, 2003-12-31 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as

compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedheim Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage
