V. Ramanadham, 2019-02-11 Public enterprises have played a central part in the development of all mixed economies in the post war period but they are now in a crisis phase Privatisation has pushed back the level of public enterprise almost throughout the world Where public enterprises remain they are being brought under significant reforms Originally published in 1991 this book presents a comprehensive critique of public enterprise analysing why its performance has fallen far short of expectations Part one is concerned with the establishment of public enterprises the case for them the circumstances in which they emerged the extra enterprise objectives attached to them and the decisions on their investment feasibility and capital structure Part two looks at the working of public enterprises the state of their financial performance the peculiarities of pricing the determination of targets which they should meet the continuous monitoring and evaluation of their operations Macro concerns are the focus of Part three Among the issues addressed are the level of indirect taxation and subsidisation implicit in the pricing structures of public enterprises the links between public enterprise and the public exchequer and the implications of their operations for distributional equity In Part four the extent to which privatisation can solve the problems of public enterprise is discussed

V. Ramanadham,2019-02-11 Originally published in 1984 this book grew out of the papers and discussions presented at the Seminar conducted at London Business School during March June 1983 with a focus on the problems of public enterprise in the context of the developing world Essentially three facts of thought emerged first on the working of public enterprises in developing countries second on joint ventures and consultancies involving public enterprises in the two groups of countries and third on the value and relevance of experience of public enterprises in developed countries particularly in the UK for the developing countries Broadly the Chapter 1 belongs to the first category Chapters 6 and 7 to the second and Chapters 8 to 13 to the third The concluding review seeks to highlight some of the major issues that deserve notice in the light of the views expressed in the papers and the discussions that took place on them **Public Enterprise and Income Distribution** V. V. Ramanadham,2019-02-11 How amenable is public enterprise to the implementation of national distributional policies This is the question explored here by Professor Ramanadham Originally published in 1988 he examines the various channels through which distributional effects take place through their operations and draws attention to the implicit conflicts of interest among consumers workers and tax payers He focuses on the problems associated with the use of public enterprises as instruments of distributional goals and examines the question of whether direct budgetary measures on the part of government would be preferable There are detailed analyses of the distributional implications of wage incomes prices and surpluses in the public enterprise sector Finally the author comments from the distributional angle on the results of privatization Here is a detailed study of the way in which public enterprise may be employed as an instrument of redistribution of income and wealth also of the extent to which this is feasible Studies in Public Enterprise V. Mansoor,1998-09-15 This paper

examines the role that privatization can play within a wider strategy designed to overcome the problems associated with public enterprises For this purpose privatization is defined as a transfer of ownership and control from the public to the private sector with particular reference to asset sales It is therefore equated with total or partial denationalization Economic efficiency is not only the key to improving the performance of the public enterprise sector but is also the source of other gains often attributed to privatization in particular its favorable budgetary impact To public enterprises that are subject to national or international competition privatization offers the possibility of increased productive efficiency as government financial backing is withdrawn and bankruptcy and takeover become possibilities The admissibility and desirability of privatization as well as what types of enterprise should be privatized ought to be determined by similar considerations in both industrial and developing countries
