Nature The Study Of History:

The Nature-Study Idea Liberty Hyde Bailey, 2024-01-15 In *The Nature Study Idea* Liberty Hyde Bailey articulated the essence of a social movement led by ordinary public school teachers that lifted education out of the classroom and placed it into firsthand contact with the natural world The aim was simple but revolutionary sympathy with nature to increase the joy of living and foster stewardship of the earth With this definitive edition John Linstrom reintroduces *The Nature Study Idea* as an environmental classic for our time It provides historical context through a wealth of related writings and introductory essays relate Bailey's vision to current work in education and the intersection of climate change and culture In this period of planetary turmoil Bailey's ambition to cultivate wonder in adults as well as children and lead readers back into the natural world is more important than ever *A Course of Study for the Preparation of Rural School Teachers, Nature Study, Elementary Agriculture, Sanitary Science, and Applied Chemistry* David Eugene Smith, Edward Douglas Greenman, Fred Mutchler, Henry Stoddard Curtis, International Commission on the Teaching of Mathematics, Mary Adelaide Nutting, Mrs. Fannie Fern (Phillips) Andrews, William Heard Kilpatrick, William Starr Myers, William James Craig, 1919 *Library of Congress Subject Headings* Library of Congress, 1992 **Library of Congress Subject Headings** Library of Congress. Methodological Challenges in Nature-Culture and Environmental History Research Jocelyn Thorpe,Stephanie Rutherford,L. Anders Sandberg,2016-11-10 This book examines the challenges and possibilities of conducting cultural environmental history research today Disciplinary commitments certainly influence the questions scholars ask and the ways they seek out answers but some methodological challenges go beyond the boundaries of any one discipline The book examines how to account for the fact that humans are not the only actors in history yet dominate archival records how to attend to the non visual senses when traditional sources offer only a two dimensional non sensory version of the past how to decolonize research in and beyond the archives and how effectively to use sources and means of communication made available in the digital age This book will be a valuable resource for those interested in environmental history and politics sustainable development and historical geography Catalogue ...
