chapters that together are effectively a commentary on those sections of the *Mirabilia* with close connections to Aristotle's *Historia animalium* and to a number of Theophrastus scientific treatises. Finally the volume ends with two chapters on thematic topics connected to natural science running throughout the work namely color and disease. The Aristotelian *Mirabilia* and Early Peripatetic Natural Science should prove invaluable to scholars and students interested in the ancient Greek study of nature, ancient philosophy and Aristotelian science in particular.
