The Science of Breath and the Philosophy of the Tattvas Rama Prasad,2017-09-15 Excerpt from The Science of Breath and the Philosophy of the Tattvas Translated From the Sanskrit With Introductory and Explanatory Essays on Nature s Finer Forces The luminiferous ether is supposed by modern science to be matter in a most refined state It is the vibrations of this element that are said to constitute light The vibrations are said to take place at right angles to the direction of the wave Nearly the same is the description of the Tejas Tattva given in the book It makes this Tattva move in an upward direction and the centre of the direction is of course the direction of the wave Besides it says that one whole vibration of this element makes the figure of a triangle About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Nature's Finer Forces Rama Prasad,2024-04-03 When Rama Prasad says The Tejas Tattva of the ancients is then exactly the luminiferous ether of the moderns so far as the nature of the vibration is concerned it is clear that he is attempting to frame his discussion of the Tattvas within a scientific discourse that would have been familiar to his readers at the time This is evident from the outset of the discussion Even though the term luminiferous ether is familiar from the 19th century physics course Aristotle was the first to suggest that ether be considered one of the five elements It is not difficult to understand how the Indian idea of k sha rapidly became associated with ether even though Rama Prasad asserts that this is an inappropriate identification In the middle of the 19th century the concept of the ether gained widespread acceptance among physicists Perhaps more importantly for this discussion the ether was also important for anyone including theologically inclined scientists and occultists as it served as a medium of cosmic reconciliation between the visible and the invisible it was a method of comprehending the interconnectedness of all phenomena After some time ether came to represent a cosmos that functions according to natural rules as well as the idea that all phenomena including economics are subject to the same natural laws

The science of breath and the philosophy of the Tattvas Rāma Prasāda,1907 [The Science of Breath and the Philosophy of the Tattvas](#) Rāma Prasād,2015-06-16 Excerpt from The Science of Breath and the Philosophy of the Tattvas Translated From the Sanskrit With Introductory and Explanatory Essays on Nature s Finer Forces A word of explanation is necessary with regard to the book now offered to the public In the ninth and tenth volumes of The Theosophist I wrote certain essays on Nature s Finer

Forces The subject of these essays interested the readers of The Theosophist so much that I was asked to issue the series of essays in book form On reading the essays for this purpose I found that in order to make a book they must be almost entirely rearranged and perhaps re written However not being equal to the task of re writing what I had once written I determined to publish a translation of the book in Sanskrit on the Science of Breath and the Philosophy of the Tattvas As more over without these essays the book would have been quite unintelligible I decided to add them to the book by way of an illustrative introduction This accordingly has been done The essays in The Theosophist have been reprinted with certain additions modifications and corrections Besides I have written several more essays in order to make the explanations more complete and authoritative About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Nature's Finer Forces** ,2025 *Nature's Finer Forces* Rāma Prasāda,1947

Nature's Finer Forces Rāma Prasāda,George Robert Stow Mead,1933 **The Science of Breath and the Philosophy of the Tattvas** Rama Prasad,1969 Esotericism and Deviance ,2024-02-06 The concept of deviance has been central to the academic study of Western esotericism since its inception This book being the proceedings of the 6th Biennial Conference of the European Society for the Study of Western Esotericism ESSWE explores the relationship between esotericism and various forms of deviance as concept category and practice from antiquity until late modernity The volume is the first to combine incisive conceptual explorations of the concept of deviance and how it informs and challenges the study of esotericism alongside a wide range of empirically grounded case discussions
