**Jesuit Science and the End of Nature's Secrets** Mark A. Waddell, 2016-03-09 *Jesuit Science and the End of Nature's Secrets* explores how several prominent Jesuit naturalists including Niccol Cabeo Athanasius Kircher and Gaspar Schott tackled the problem of occult or insensible causation in the seventeenth century The search for hidden causes lay at the heart of the early modern study of nature and included phenomena such as the activity of the magnet the marvelous powers ascribed to certain animals and plants and the hidden destructive forces churning in the depths of the Earth While this was a project embraced by most early modern naturalists however the book demonstrates that the Jesuits were uniquely suited to the study of nature's hidden secrets because of the complex methods of contemplation and meditation enshrined at the core of their spirituality Divided into six chapters the work documents how particular Jesuits sought to reveal and expose nature's myriad secrets through an innovative blending of technology imagery and experiment Moving beyond the conventional Aristotelianism mandated by the Society of Jesus they set forth a vision of the world that made manifest the works of God as Creator no matter how deeply

hidden those works were The book thus not only presents a narrative that challenges present day assumptions about the role played by Catholic religious communities in the formation of modern science but also captures the exuberance and inventiveness of the early modern study of nature

the traditional academic disciplines Medieval interest in the secrets of nature was spurred in part by ancient works such as Pliny's Natural History As medieval experimenters adapted ancient knowledge to their changing needs they created their own books of secrets which expressed the uncritical empiricist approach of popular culture rather than the subtle argumentation of scholastic science The crude experimental methodology advanced by the professors of secrets became for the new philosophers of the seventeenth century a potent ideological weapon in the challenge of natural philosophy
