Counterinsurgency Douglas Porch,2013-07-11 Counterinsurgency has staked its claim in the new century as the new American way of war Yet the wars in Afghanistan and Iraq have revived a historical debate about the costs monetary political and moral of operations designed to eliminate insurgents and build nations Today s counterinsurgency proponents point to small wars past to support their view that the enemy is biddable if the correct tactical formulas are applied Douglas Porch s sweeping history of counterinsurgency campaigns carried out by the three providential nations of France Britain and the United States ranging from nineteenth century colonial conquests to General Petraeus Surge in Iraq challenges the contemporary mythologising of counterinsurgency as a humane way of war The reality he reveals is that hearts and minds has never been a recipe for lasting stability and that past counterinsurgency campaigns have succeeded not through state building but by shattering and dividing societies while unsettling civil military relations      **Taming the Elephant** John F. Cliff,2015-09-15 Once termed the world's largest military museum the Chinese military has made enormous progress over the past twenty years With skyrocketing military budgets and new technology China's tanks aircraft destroyers and missile capabilities are becoming comparable to those of the United States If these trends continue how powerful will the Chinese military be in the future Will its capabilities soon rival or surpass those of the United States The most comprehensive study of its kind this book provides a detailed assessment of China's military capabilities in 2000 and 2010 with projections for 2020 It is the first of its kind in outlining a rigorous theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine training equipment and organizational structure This framework provides not only the most accurate assessment of China's military to date but an important new tool in the study of military history     *Air Power's Gordian Knot* Stephen J.
