Superintendent of Documents, 1987 **Aircraft, Airports, and Airways** United States. Superintendent of Documents, 1991 *Military History* United States. Superintendent of Documents, 1990 *Wings of Gold* Wesley Phillips Newton, Robert R. Rea, 2015-04-15 *Wings of Gold* presents the personal account of the experiences and reactions of an individual cadet preparing for war in the naval aviation training program at its peak during World War II Monthly Catalogue, United States Public Documents, 1987 *Naval Historical Publications in Print* Naval Historical Center (U.S.), 1992 United States Statutes at Large United States, 1989 **Biplanes at War** Wray R. Johnson, 2019-04-16 Unlike the relative uniformity of conventional warfare the peculiarities of small wars prevent a clear definition of rules and roles for military forces to follow During the small wars era aviation was still in its infancy and the US military had only recently begun battling in the skies The US Marine Corps recognized that flexibility and ingenuity would be critical to the successful conduct of small wars and thus employed the new technology of aviation In *Biplanes at War* US Marine Corps Aviation in the Small Wars Era 1915 1934 author Wray R Johnson provides a riveting history of the marines use of aviation between the world wars a time in which young soldiers were volunteering to fly in combat when flying itself was a dangerous feat Starting with Haiti in 1915 *Biplanes at War* follows the marines aviation experiences in Haiti the Dominican Republic China and Nicaragua chronicling how marines used aircraft to provide supporting fires e g dive bombing to ground troops in close contact with irregular opponents evacuate the sick and wounded transport people and cargo e g to assist humanitarian operations and even support elections in furtherance of democracy After years of expanding the capabilities of airplanes far beyond what was deemed possible the small wars era ended and the US Marines Corps transitioned into an amphibious assault force The legacy of the marines ability to adapt and innovate during the small wars era endures and provides a useful case study *Biplanes at War* sheds light on how the marines pioneered roles and missions that have become commonplace for air forces today an accomplishment that has largely gone unrecognized in mainstream histories of aviation and air power

Stalking the U-Boat Geoffrey L. Rossano, 2021-08-15 An exceptional piece of scholarship Rossano clearly points out that military organizations in general and a naval air force in particular are built from the ground up and not the other way around While we celebrate the exploits of the pilots Rossano reminds us that there were myriad mechanics constructors paymasters and even some ship drivers who played a vital role in naval aviation during WWI Craig C Felker U S Naval Academy A fine book that will stand for many years as the definitive study of U S naval aviation in Europe Well researched

and written the book ranges widely from the high level planning in Washington for a naval air war to moving thousands of men and hundreds of aircraft across the ocean to the routine but dangerous training patrol and bombing flights that constituted the navy's air mission in World War I William F Trimble author of *Attack from the Sea Stalking the U Boat* is the first and only comprehensive study of U S naval aviation operations in Europe during WWI The navy's experiences in this conflict laid the foundations for the later emergence of aviation as a crucial sometimes dominant element of fleet operations yet those origins have been previously poorly understood and documented Begun as antisubmarine operations naval aviation posed enormous logistical administrative personnel and operational problems How the USN developed this capability on foreign soil in the midst of desperate conflict makes a fascinating tale sure to appeal to all military and naval historians
