Naval Aviation In World War I:

Naval Aviation in the First World War R. D. Layman, 1996 All aspects of naval aviation in World War I are detailed in this superbly researched book **Naval Aviation in World War I** Adrian O. Van Wyen, 1969 **Naval Aviation in World War I** Adrian O. Van Wyen, Naval Aviation News, 2005 When the call to battle sounded in April 1917 the Navy air arm could muster at its one air station only 48 officers and 239 enlisted men with some experience in aviation and 54 aircraft none of which was fit for patrol service The problems of building this small force to a effective fighting unit were enormous Yet the Armistice was signed 19 months later there were 43 air stations in operation at home and abroad an aircraft factory in production and numerous schools assembly plants repair depots and other facilities providing the needed logistic support Aviation personnel numbered over 39000 a figure nearly equal to the total in the entire Navy at the start of the war Little has been published on the nature and extent of Naval air operations in the first World War until in April 1967 Naval Aviation News began a series of monthly articles under the general title Naval Aviation in World War I Using chronologies of significant events and narrative accounts of special phases of the war this series told the story of how Naval Aviation met the challenge The series was conceived by and completed under the direction of the Assistant for Aviation History Mr A O Van Wyen who also wrote many of the articles and arranged for the writing of others While not a definitive history it is the first published word to deal specifically with the accomplishments of Naval Aviation in the first World War Based on official sources as well as the recollections of participants it is authoritatively presented through an interesting combination of official and personal accounts It is also the history of a beginning made under stress of war a beginning in which the men of Naval Aviation demonstrated the potential of aviation as an arm of sea power and set the course for its future growth The success with which they carried out their task is in large measure responsible for the position of aviation at the forefront of Naval power today T F Connolly Vice Admiral USN Deputy Chief of Naval Operations Air **Naval Aviation in World War 1** United States. Office of the Chief of Naval Operations, A. O. Van Wyen, 1965 United States Naval Aviation 1910-1918 Noel C. Shirley, 2000 United States Naval Aviation 1910 1918 for the first time provides a comprehensive study of the formation and initial deployment of naval aviation in a world war The late eminent naval historian R D Layman wrote that the subject of naval aviation has never been adequately explored had been often underestimated ignored or unrealized The author of this book based upon over thirty years of research into the subject of World War I aviation and based upon both primary and secondary reference sources has compiled into one source a complete history of the early development of naval aviation in the United States He then discusses the manner and role that the naval aviation service applied to the war effort during 1917 1918 The book covers not only the subject of naval aircraft but also describes the activities of the Navy in the field of lighter than air craft Specific information is provided on each of the Naval Air Stations constructed and operated both domestically as well as in Foreign Service during the War Detailed discussion is also provided regarding the role of Marine

Naval Aviation in the Second World War Philip Kaplan, 2013-10-30 The first aircraft carriers made their appearance in the early years of World War I. These first flattops were improvised affairs built on hulls that had been laid down with other purposes in mind and it was not until the 1920s that the first purpose built carriers were launched but no one was as yet clear about the role of the carriers and they were largely unloved by the battleship admirals who still believed that their great dreadnoughts were the ultimate capital ships. World War II changed all that. At Taranto, Pearl Harbour and in the North Atlantic the carrier, the ugly duckling of the world's navies, proved itself to be the dreadnought nemesis. As the tide of war turned, the fast attack carriers of the U.S. Navy spearheaded the counter attack in the Pacific while the makeshift escort carriers helped to seal the fate of the German U-boats in the Atlantic. The carrier and naval aviation thus emerged into the post war world as the primary symbol and instrument of seapower; it would play a crucial role in the strategic encirclement of the Soviet Union and enabled western airpower to be rapidly and effectively deployed in areas of conflict as remote as Korea, Vietnam, the Falklands and the Gulf. Kaplan describes the adventure of the young American, British and Japanese naval aviators in the Second World War. It is an account of their experiences based on archives, diaries, published and unpublished memoirs and personal interviews with veteran naval airmen of WWII, providing a vivid and often hair-raising picture of the dangers they encountered in combat and of everyday life aboard an aircraft carrier. It considers some of the key aspects of the WWII naval aviator's combat career such as why it was that only a tiny minority of these pilots, those in whom the desire for aerial combat overrode everything, accounted for such a large proportion of the victories. In the major carrier actions of that conflict, from the Royal Navy's attack on Taranto which crippled the Italian fleet in 1940 to the Japanese carrier launched surprise attack on U.S. Navy battleships and facilities at Pearl Harbour in 1941 to the carrier battle of Midway in 1942 and the Great Marianas Turkey Shoot of 1944 through the Japanese Kamikaze campaign against the U.S. carriers in the final stages of the Pacific war, this book takes the reader back to one of the most exciting and significant times in modern history.
