Naval Science 2:

Naval Science 2 Richard R. Hobbs, 2014-09 Naval Science 2 3rd Edition is the new edition of a textbook that has long been a staple work for the NJROTC program. It provides a survey of early maritime history as well as the history of the U S Navy. In addition, this textbook covers the key leadership precepts and nautical sciences required by second year students in the Navy high school NJROTC program. Subjects covered include maritime geography, oceanography, meteorology, astronomy, and physical science including timely topics such as global warming, green energy, and computer science. The highly illustrated text provides the fundamental background necessary for follow on studies in all these areas at either the senior high school or college level. *Naval Science 2* Richard R. One objective was to determine changes in course offering and selection patterns since the previous studies in 1982, 1987, and 1990. Another objective was to compare course taking patterns to results from the National Assessment of Educational Progress (NAEP), an assessment of educational achievement nationwide. In 1994, transcripts were collected for more than 25,000 students who graduated from high school that year. These students were from 340 schools that participated in the NAEP. Information in this report documents a significant increase since 1982 in the percentage of graduates completing curricula recommended by the National Commission on Excellence in Education. As of 1994, over 25% of high school graduates are completing programs satisfying the Commission's recommendations for college bound
