Jaimey Fisher, 2007-06-20 A look at how the discussions, debates and controversies in Germany about youth and reeducation after World War II helped Germans come to terms with their Nazi past, negotiate Allied occupation and construct postwar German identity. During Hitler's reign, the Nazis deliberately developed and exploited a youthful image and used youth to define their political and social hierarchies. After the war, with Hitler gone but still requiring cultural exorcism, many intellectuals, authors and filmmakers turned to these images of youth to navigate and negotiate the most difficult questions of Germany's recent nefarious past. Focusing on youth education and crime allowed postwar Germans to claim one last realm of sovereignty against the Allies' own emphatic project of reeducation. Youth reeducation and reconstruction became important sites for the occupied to confront not only the recent past but to negotiate the present occupation and ultimately direct the future of the German nation. *Disciplining Germany* analyzes a variety of media including literature, news media, intellectual history and films in order to argue that youth and education played a central role in Germany's coming to terms with the Nazi past. Although there has been a recently renewed interest in Germany's coming to terms with the past, this attention has largely ignored the role of youth and reeducation. This lacuna is particularly perplexing given that the Allies' reeducation project became in many ways a cipher for the occupational project as a whole. *Disciplining Germany* opens up the discussion and points toward more general conclusions not only about youth and education as sites for wider socio-political and cultural debates but also about the complexities of occupation and the intertwining of different national cultures. In this investigation, the study attends to both high and low cultural text to specialized versus popular texts to examine how youth was mobilized across the generic spectrum. With these interdisciplinary approaches and timely interventions, *Disciplining Germany* will find a diverse readership including upper division and graduate courses in German studies and German history as well as those general readers interested in Nazi Germany, cultural history, film and literary studies, youth culture, American studies and post-conflict and occupational situations. Nazi History and the Holocaust, 1999 The Nazi Revolution. Germany's Guilt Or Germany's Fate? Ed. and with an Introduction by John L. Snell, 1966 **Justifying Historical Descriptions** C. Behan McCullagh, 1984-10-25 In common with history, all the social sciences crucially rely on descriptions of the past for their evidence. But when, if ever, is it reasonable to regard such descriptions as true? This book attempts to establish the conditions that warrant belief in historical descriptions. It does so in a non-technical way, analysing numerous illustrations of the different kinds of argument about the past employed by historians and others. The author concludes that no historical description can be finally proved and that we are only ever justified in believing them for certain practical purposes. This central question has not been addressed in such a thorough and systematic manner before. It draws on recent philosophy of history and will interest philosophers. But the wealth of material and accessibility of the presentation will also make it very valuable for historians and other social scientists concerned with the logic of their disciplines. *Contemporary Jewish Reality in Germany and Its Reflection in Film* Claudia Simone Dorchain, Felice Naomi Wonnemberg, 2012-12-06 The notion of

self and other and its representation in artwork and literature is an important theme in current cultural sciences as well as in our everyday life in contemporary Western societies Moreover the concept of self and other and its imaginary dichotomy is gaining more and more political impact in a world of resurfacing ideology ridden conflicts The essays deal with Jewish reality in contemporary Germany and its reflection in movies from the special point of view of cultural sciences political sciences and religious studies This anthology presents challengingly new insights into topics rarely covered such as youth culture or humor and finally discusses the images of Jewish life as realities still to be constructed Paths of Continuity Hartmut Lehmann, James Van Horn Melton, 2003-01-30 The defeat of National Socialism in 1945 was a pivotal point in Central European history For the writing and practice of history however the event proved far less decisive In West Germany and Austria most historians who had taught under the Nazis retained their positions after 1945 Even those dismissed for their National Socialist sympathies were often able to resume their careers And an entire generation of younger historians trained during the Nazi years was to enter the historical profession after 1945 Paths of Continuity examines the effect of this professional continuity on West German historical scholarship and the impact of the Third Reich on the way German language historians practiced their craft The essays look at ten prominent German and Austrian historians whose lives and work spanned the period before and after 1945 Friedrich Meinecke Gerhard Ritter Hans Rothfels Franz Schnabel Heinrich Ritter von Srbik Hans Freyer Hermann Aubin Otto Brunner Werner Conze and Theodor Schieder All responded to the Nazi regime in different ways Some willingly embraced the New Order of National Socialism others kept their distance from the regime or openly opposed it Ironically however those who were least compromised by Nazi involvements and who emerged after 1945 with the greatest moral and professional authority often proved the most resistant to change within the discipline Conversely much of the impetus for scholarly innovation after 1945 came from historians with earlier ties to the anti liberal folk history of the Nazi era Exploring these and other paradoxes this collection of essays provides fresh insight into the development of German historical scholarship since 1945 **The Nazi Revolution-Germany's Guilt Or Germany's Fate? Edited, and with an Introduction, by J. L. Bloch he suggests their indebtedness to the traditions of Jewish messianism In a discussion of Hugo Ball's little known Critique of the German Intelligentsia Rabinbach reveals the curious intellectual career of the Dadaist and antiwar activist turned nationalist and anti Semite His examination of Heidegger's Letter on Humanism and Jaspers's The Question of German Guilt illuminates the complex and often obscure political referents of these texts Turning to Horkheimer and Adorno's Dialectic of Enlightenment Rabinbach offers an arresting new interpretation of this central text of the critical theory of the Frankfurt School Subtly and persuasively argued his book will become an indispensable reference point for all concerned with twentieth century German history and thought This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997 These essays by eminent European intellectual and cultural historian Anson Rabinbach address the writings of key figures in twentieth century German philosophy Rabinbach explores their ideas in relation to the two world wars and the horrors facing Europe *The German Church Struggle and the Holocaust* Franklin Hamlin Littell, Hubert G.
