

THE NAKED WAR ON CANCER

ROBERT N. PROCTOR

Nazi War On Cancer

Robert Proctor

Nazi War On Cancer:

The Nazi War on Cancer Robert Proctor, 2024-05-14 A troubling account of how good science can come from an evil regime Collaboration in the Holocaust Murderous and torturous medical experiments The euthanasia of hundreds of thousands of people with mental or physical disabilities Widespread sterilization of the unfit Nazi doctors committed these and countless other atrocities as part of Hitler's warped quest to create a German master race Robert Proctor recently made the explosive discovery however that Nazi Germany was also decades ahead of other countries in promoting health reforms that we today regard as progressive and socially responsible Most startling Nazi scientists were the first to definitively link lung cancer and cigarette smoking Proctor explores the controversial and troubling questions that such findings raise Were the Nazis more complex morally than we thought Can good science come from an evil regime What might this reveal about health activism in our own society Proctor argues that we must view Hitler's Germany more subtly than we have in the past But he also concludes that the Nazis forward looking health activism ultimately came from the same twisted root as their medical crimes the ideal of a sanitary racial utopia reserved exclusively for pure and healthy Germans Author of an earlier groundbreaking work on Nazi medical horrors Proctor began this book after discovering documents showing that the Nazis conducted the most aggressive antismoking campaign in modern history Further research revealed that Hitler's government passed a wide range of public health measures including restrictions on asbestos radiation pesticides and food dyes Nazi health officials introduced strict occupational health and safety standards and promoted such foods as whole grain bread and soybeans These policies went hand in hand with health propaganda that for example idealized the Führer's body and his nonsmoking vegetarian lifestyle Proctor shows that cancer also became an important social metaphor as the Nazis portrayed Jews and other enemies of the Volk as tumors that must be eliminated from the German body politic This is a disturbing and profoundly important book It is only by appreciating the connections between the normal and the monstrous aspects of Nazi science and policy Proctor reveals that we can fully understand not just the horror of fascism but also its deep and seductive appeal even to otherwise right thinking Germans

The Secret History of the War on Cancer Devra Davis, 2009-02-24 From the National Book Award finalist and author of *When Smoke Ran Like Water* comes this searing haunting and deeply personal account of how a major public health effort was diverted and distorted for private gain *Ravenous: Otto Warburg, the Nazis, and the Search for the Cancer-Diet Connection* Sam Apple, 2021-05-25 The extraordinary story of the Nazi era scientific genius who discovered how cancer cells eat and what it means for how we should live The Nobel laureate Otto Warburg a cousin of the famous finance Warburgs was widely regarded in his day as one of the most important biochemists of the twentieth century a man whose research was integral to humanity's understanding of cancer He was also among the most despised figures in Nazi Germany As a Jewish homosexual living openly with his male partner Warburg represented all that the Third Reich abhorred Yet Hitler and his top advisors dreaded cancer and protected Warburg in the hope that he could

cure it In *Ravenous* Sam Apple reclaims Otto Warburg as a forgotten morally compromised genius who pursued cancer single mindedly even as Europe disintegrated around him While the vast majority of Jewish scientists fled Germany in the anxious years leading up to World War II Warburg remained in Berlin working under the watchful eye of the dictatorship With the Nazis goose stepping their way across Europe systematically rounding up and murdering millions of Jews Warburg awoke each morning in an elegant antiques filled home and rode horses with his partner Jacob Heiss before delving into his research at the Kaiser Wilhelm Society Hitler and other Nazi leaders Apple shows were deeply troubled by skyrocketing cancer rates across the Western world viewing cancer as an existential threat akin to Judaism or homosexuality Ironically they viewed Warburg as Germany's best chance of survival Setting Warburg's work against an absorbing history of cancer science Apple follows him as he arrives at his central belief that cancer is a problem of metabolism Though Warburg's metabolic approach to cancer was considered groundbreaking his work was soon eclipsed in the early postwar era after the discovery of the structure of DNA set off a search for the genetic origins of cancer Remarkably Warburg's theory has undergone a resurgence in our own time as scientists have begun to investigate the dangers of sugar and the link between obesity and cancer finding that the way we eat can influence how cancer cells take up nutrients and grow Rooting his revelations in extensive archival research as well as dozens of interviews with today's leading cancer authorities Apple demonstrates how Warburg's midcentury work may well hold the secret to why cancer became so common in the modern world and how we can reverse the trend A tale of scientific discovery personal peril and the race to end a disastrous disease *Ravenous* would be the stuff of the most inventive fiction were it not in fact true *Dimensions*, 1999 *Death by Design* Eric Katz, 2006 Through a selection of primary and secondary sources *Death by Design* examines the uses of technology during the Holocaust and the specific ways in which scientists architects medical professionals businessmen and engineers participated in the planning and operation of the concentration and extermination camps that were the foundation of the final solution The book discusses the overriding intellectual ethical and philosophical implications of the Nazi's use of science and technology in their killing operations **Cancer in the Twentieth Century** David Cantor, 2008-05-26 This collection of essays explores efforts to control and prevent cancer in North America and Europe On both sides of the Atlantic control programs emerged in the early twentieth century and most were focused on early detection and treatment Yet those initiatives took very different forms in different countries Experts disagreed on how to persuade the public to go to their doctors what should be the role of public education how cancer services should be delivered who should provide them which forms of therapy were most appropriate to particular cancers and where to draw the line between therapy and prevention Focusing on the United States and Britain this volume examines why these differences emerged how they shaped national programs of control and how control programs in the early twentieth century presaged and set the conditions for the emergence of prevention oriented programs in the 1960s and 1970s Featuring works by leading medical historians on

subjects such as the portrayal of cancer in the movies feminist surgeons risk factors for breast cancer and the emergence of clinical trials Cancer in the Twentieth Century will engage historians of medicine and public health as well as health policy analysts medical sociologists and anthropologists and medical researchers and practitioners The German Patient Jennifer M. Kapczynski, 2008-11-11 A fascinating study of disease as a trope in German debates about the Nazi past BMJ, 2000

The American Enterprise, 1999 First Things, 2000 **New Scientist**, 1999 **Lingua Franca**, 1999 Bulletin of the History of Medicine, 2007 Includes the Transactions of the 15th annual meetings of the American Association of the History of Medicine 1939 *Journal of the National Cancer Institute*, 1999 Summaries of papers contained in the journal accompany each issue 19 *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences*, 2000 **The Year 1000**, 2000 **Book Review Digest**, 2001 *Life with Breast Cancer: Timing Medical Intervention* Sotiria Theoharis, 2006 This dissertation studies breast cancer care historically and ethnographically to address four questions 1 how breast care structures and normalizes the actions of medical scientists care providers and women 2 how medical scientists make breast cancer facts 3 how medical paradigms habituate in institutions bolster professionals and lived through the women affected by the disease 4 what are the emerging parameters for women's participation *Ideas on Liberty*, 2000 *The New Republic* Herbert David Croly, 1998
