Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish s careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish s book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church

University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself *Untapped Power* Carla Koppell, 2022-02-01 The global MeToo and BlackLivesMatter movements as well as the push for LGBTQ rights are all emblematic of a growing interest in and focus on how to better embrace and capitalize on diversity Yet these social movements exist alongside renewed efforts to constrain minority rights and stem immigration around the world In *Untapped Power* Carla Koppell has assembled a leading group of scholars policy makers researchers and activists to provide a comprehensive overview for understanding and navigating these countervailing forces so that we can build a more peaceful and inclusive world **Handbook of Research on Nurturing Industrial Economy for Africa's Development** Nafukho, Frederick Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty During this Fourth Industrial Revolution era there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy The *Handbook of Research on Nurturing Industrial Economy for Africa's Development* examines various innovations necessary for Africa's economic development including drivers of the manufacturing economy such as education agriculture human capital science and technological innovations language politics and business environments The book explores strategies to increase Africa's economic diversity complexity productivity and ultimately competitiveness and for the continent to realize its manufacturing industrial potential Further chapters focus on African countries industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals
