

Preparation of Papers in Two-Column Format for IEEE-MEPCON'15 Conference Proceedings

Bart Simpson and Homer Simpson

Department of Nuclear Power Engineering
University of Springfield
Springfield, Nostate 12345, USA

[bart.simpson & homer.simpson]@uspringfield.edu

Abstract - These instructions give you the basic guidelines for preparing papers for IEEE MEPCON'14 conference proceedings.

Index Terms - List key index terms here. No more than 5.

I. INTRODUCTION

Your goal is to simulate the usual appearance of papers in *IEEE conference proceedings*. For items not addressed in these instructions, please refer to the last issue of your conference's proceedings for reference or ask your conference Publications Chair for instructions.

A. Preparing Your Paper

1) **Paper Size:** Prepare your paper in full-size format on US letter size paper (8.5 by 11 inches).

2) **Type Sizes and Typefaces:** Follow the font type sizes specified in Table I. The font type sizes are given in points, same as in the MS Word font size points. Times New Roman is the preferred font.

3) **Paper Margins:** Paper margins on the US letter size paper are set as follows: top = 0.75 inches, bottom = 1 inch, side = 0.625 inches. Each column measures 3.5 inches wide, with a 0.25-inch gap between the two columns.

4) **Paper Styles:** Left- and right-justify the columns. On the last page of your paper, adjust the lengths of the columns so that they are equal. Use automatic hyphenation and check spelling and grammar. Use high resolution (300dpi or above) figures, plots, drawings and photos for best printing result.

TABLE I
TYPE SIZE FOR PAPERS

Type size (pts.)	Appearance		
	Regular	Bold	Italic
6	Table superscripts		
8	Section titles*, references, tables, table names*, table captions, figure captions, footnotes, text subscripts, and superscripts		
9		Abstract, Index Terms	
10	Authors' affiliations, main text, equations, first letter in section titles*		Subheading
11	Authors' names		
12	Paper title		

*Uppercase

B. Preparing Your PDF Paper for IEEE Xplore®

Detailed instructions on how to prepare PDF files of your papers for IEEE Xplore® can be found at

<http://www.ieee.org/pubs/confpubcenter>

PDF job setting files for Acrobat versions 4, 5 and 6 can be found for downloading from the above webpage as well. The instructions for preparing PDF papers for IEEE Xplore® must be strictly followed.

II. HELPFUL HINTS

A. Figures and Tables

Try to position figures and tables at the tops and bottoms of columns and avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be centered below the figures; table captions should be centered above. Avoid placing figures and tables before their first mention in the text. Use the abbreviation "Fig. #," even at the beginning of a sentence.

Figure axis labels are often a source of confusion. Use words rather than symbols. For example, as shown in Fig. 1, write "Magnetization," or "Magnetization (M)" not just "M." Put units in parentheses. Do not label axes only with units. In the example, write "Magnetization (A/m)" or "Magnetization (A · m⁻¹)." Do not label axes with a ratio of quantities and units. For example, write "Temperature (K)," not "Temperature/K."

Multipliers can be very confusing. Write "Magnetization (kA/m)" or "Magnetization (10³ A/m)." Figure labels should be legible, at 8-point type.

Fig. 1 Magnetization as a function of applied field.
Note how the caption is centered in the columns.

B. References

Number citations consecutively in square brackets [1]. Punctuation follows the bracket [2]. Refer simply to the
