SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory a theory which applies to all or most domains

of organized human activity This aspiration inevitably produces decontextualized and therefore abstract categories of practice Howard Gardner's 1995 depiction of leadership as story telling is a case in point *Jsl Vol 7-N3 JOURNAL OF SCHOOL LEADERSHIP*,1997-05-01 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement **Global Perspectives on Educational**

The Knowledge Base in Educational Administration Robert Donmoyer,Michael Imber,James Joseph Scheurich,1995-07-01 For scholars and practitioners who are interested in or are concerned about knowledge based issues this book provides a needed antidote to narrow discussions of foundational issues The editors of this book maintain that discussions of a knowledge base in educational administration have typically been limited to a fairly traditional range of scholarly commentary reflective of the status quo within departments of educational administration over the past several decades Other views such as feminist views race ethnic based orientations those that dispute the very idea of a knowledge base and those that simply expand the traditional range have been given little attention within the knowledge base discourse The purpose of this book is thus to open up this discourse by broadening the range of viewpoints being considered
