Bureau Of Standards,2017-11-17 Excerpt from Proposed National Electrical Safety Code Preliminary Edition Submitted for Discussion and Criticism Not for Adoption It is the hope of the Bureau of Standards that when the code has been revised once more and approved by the Washington conference and republished it may be adopted very generally and with the minimum of changes by individual States or cities It is suggested however that the first year may be made a trial year during which the companies inspectors and commissions may become thoroughly acquainted with its practical operation and that it be not enforced in any strict sense until after the first year We believe that if the utilities and other companies coming under it are invited to try out the code to comply as well as they can to report wherein it is not satisfactory and to assist in the effort to remedy its defects by revision at the end of the first year far better results will be attained in the end than if it is made compulsory at the start Some commissions and cities might delay adopting it formally if a strict enforcement were expected from the beginning whereas they might be entirely willing to adopt it at once in the experimental way suggested It is believed that this plan will secure the fullest cooperation of all interests concerned which is much to be desired About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
