**The Materiality and Spatiality of Death, Burial and Commemoration** Christoph Klaus Streb, Thomas Kolnberger, 2021-09-28 Death dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparent inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts mementos and memorials are exteriorised materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values ideas and criteria of social distinction are reproduced legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality spatiality the living and the dead The chapters in this book were originally published as a special issue of the journal *Mortality* **Out**, 1997

**Throwing the Party** Wayne Batchis, 2022-06-30 The Supreme Court's jurisprudence on political parties is rooted in an incomplete story Parties are like voluntary clubs associations of individuals that are represented by a singular organization However as political science has long understood they are much more than this Parties are also the voters who choose and support their candidates the elected officials who govern the activists and volunteers who contribute their time and energy and the individual and organizational donors who open their wallets Unfortunately the Court's framework for understanding America's two party system has largely ignored this broader conception of political parties The result has been a distortion of the true nature of the two party system and a body of deeply inconsistent and contradictory constitutional case law From primaries to campaign finance partisan gerrymandering to ballot access law and politics scholar Wayne Batchis interrogates scrutinizes and offers a proposed solution to this problematic jurisprudence
