What Is the Present? Michael North, 2025-06-17 A provocative new look at concepts of the present their connection to ideas about time and their effect on literature art and culture The problem of the present what it is and what it means is one that has vexed generations of thinkers and artists Because modernity places so much value on the present many critics argue that people today spend far too much time in the here and now but how can we tell without first knowing what the here and now actually is What Is the Present takes a provocative new look at this moment in time that remains a mystery even though it is always with us Michael North tackles puzzles that have preoccupied philosophy neuroscience psychology history and aesthetic theory and examines the complex role of the present in painting fiction and film He engages with a range of thinkers from Aristotle and Augustine to William James and Henri Bergson He draws illuminating examples from artists such as Fra Angelico and Richard McGuire filmmakers like D W Griffith and Christopher Nolan and novelists such as Elizabeth Bowen and Willa Cather North offers a critical analysis of previous models of the present from the experiential present to the historical period we call the contemporary He argues that the present is not a cosmological or experiential fact but a metaphor a figurative relationship with the whole of time Presenting an entirely new conception of the temporal mystery Georg Lukacs called the unexplained instant What Is the Present explores how the arts have traditionally represented the present and also how artists have offered radical alternatives to that tradition [Know Your Aptitude for Class 9 \(A.Y. 2023-24\) Onward](#) J. The Ecology of Tropical East Asia Richard T. Corlett, 2019-06-27

Tropical East Asia is home to over one billion people and faces massive human impacts from its rising population and rapid economic growth. It has already lost more than half of its forest cover to agriculture and urbanization and has the highest rates of deforestation and logging in the tropics. Habitat loss coupled with hunting and the relentless trade in wildlife products threatens all its large and many of its smaller vertebrates. Despite these problems, the region still supports an estimated 15-25% of global terrestrial biodiversity and a growing environmental awareness means that it is no longer assumed that economic development justifies environmental damage and no longer accepted that this trade-off is inevitable. Effective conservation action now depends on integrating a clear understanding of the ecological patterns and processes in the region with the varied needs of its human population. This third edition continues to provide an overview of the terrestrial ecology of Tropical East Asia from southern China to Indonesia and from Bhutan and Bangladesh to the Ryukyu Islands of Japan. It retains the balance between compactness and comprehensiveness of the previous editions and the even-handed geographical treatment of the whole region but it updates both the contents and the perspective. Approximately one-third of the text is new or greatly modified, reflecting the explosion of new research in the region in the last few years and the increasing use of new tools, particularly from genomics and remote sensing. The change in perspective largely reflects the growing realization that we are in a new epoch, the Anthropocene, in which human activities have at least as large an influence as natural processes and that stopping or reversing ecological change is no longer an option. This does not mean that biodiversity conservation is no longer possible or worthwhile but that the biodiverse future we strive for will inevitably be very different from the past. *The Ecology of Tropical East Asia* is an advanced textbook suitable for senior undergraduate and graduate level students taking courses on the terrestrial ecology of the East Asian tropics as well as an authoritative regional reference for professional ecologists, conservationists and interested amateurs worldwide. **Development**

Walter Benjamin and the Idea of Natural History Eli Friedlander, 2024-01-16 In this incisive new work, Eli Friedlander demonstrates that Walter Benjamin's entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human beings belong to nature. Across seemingly heterogeneous writings, Friedlander argues Benjamin consistently explores what the natural in the human comes to—that is, how nature is transformed, actualized, redeemed, and overcome in human existence. The book progresses gradually from Benjamin's philosophically fundamental writings on language and nature to his Goethean empiricism, from the presentation of ideas to the primal history of the Paris arcades. Friedlander's careful analysis brings out how the idea of natural history inflects Benjamin's conception of the work of art and its critique, his diagnosis of the mythical violence of the legal order, his account of the body and of action of material
