Timmons, 2021-04-15 The New Art Museum Library addresses the issues facing today's art museum libraries through a series of scholarly essays written by top librarians in the field In 2007 the publication

Art Museum Libraries and Librarianship edited by Joan Benedetti was the first to solely focus on the field of art museum librarianship. In the decade since then many changes have occurred in the field both technological and ideological prompting the need for a follow up publication. In addition to representing current thinking and practice this new publication also addresses the need to clearly articulate and define the art museum library's value within its institution. It documents the broad changes in the environment that art museum libraries now function within and to celebrate the many innovative initiatives that are flourishing in this new landscape. Librarians working in art museum face unique challenges as museums redefine what object based visitor centric learning looks like in the 21st century. These unique challenges mean that art museum libraries are developing new strategies and initiatives so that they can continue to thrive in this environment. The unique nature of these initiatives mean that they will be useful to librarians working in a wide range of special libraries as well as more broadly in academic and public libraries. The New Art Museum Library is uniquely positioned to present new strategies and initiatives including digital art history initiatives, the new norms in art museum library staffing and the public programming priorities that are core to many art museum libraries today. This book is an endorsed project of ARLIS NA.

Economic Considerations for Libraries, Archives and Museums Lorraine A. Stuart, Thomas F.R. Clareson, Joyce Ray, 2021-11-11. Economic Considerations for Libraries, Archives and Museums provides insight into the economics of collaboration across Libraries, Archives and Museums (LAMs) and cultural heritage funding. Drawing together a series of global reflections on the past, present and future of cross sector approaches to preserving and promoting cultural heritage, this volume examines the economic prospects of LAMs from a variety of facets. Divided into five sections, the book covers the five most important areas in the development and sustainability of collaborative LAM projects: the digital environment, collaborative models, education, funding issues and alternate sources of funding. Responding directly to the issue of a lack of adequate funding for maintaining and providing access to cultural heritage resources globally, the book argues that cultural heritage institutions must seek creative methods for funding and collaboration at all levels to achieve shared goals. Economic Considerations for Libraries, Archives and Museums will be of interest to all those engaged in the study of library and information science, archival studies, museum studies and digital preservation. Administrators and practitioners will also find much to interest them within the pages of the book.
