**LL Leslie**

A decorative graphic element consisting of a light blue horizontal bar with a rounded right end, and a red circular shape partially visible behind it.

## **Preserving Communities And Corridors:**

**Preserving Communities & Corridors** Gay Mackintosh,1989      *Linkages in the Landscape* Andrew F. Bennett,2003

The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation Habitat corridors are sometimes proposed as an important element within a conservation strategy Examples are given of corridors both as pathways and as habitats in their own right Includes detailed reviews of principles relevant to the design and management of corridors their place in regional approaches to conservation planning and recommendations for research and management      To Preserve Biodiversity (Readings from Conservation Biology) David Ehrenfeld,2009-07-01 This new series of readings from Conservation Biology gives easy access to some of the finest papers ever published in a range of important fields Readings in Conservation Biology can make course preparation easy It provides a ready made collection of the best most representative papers available in a format students can use Readings will also be invaluable for researchers and academics needing an update in a specific subject area      *Corridor Preservation* ,1996      **Corridor Preservation: Study of legal and institutional barriers** ,1996      Big Thicket National Preserve (N.P.), Oil and Gas Management Plan ,2005

**Preserving Freight and Passenger Rail Corridors and Service** David P. Simpson,National Cooperative Highway Research Program,2007 Efforts to preserve rail corridors or restore rail service to dormant rail alignments across the United States are very uneven A handful of states have aggressive well funded programs to support the preservation or reuse of rail alignments more states have modest programs to support short line operations on a case by case basis but attach no value to corridor retention per se In 2005 California completed what is perhaps the nations most comprehensive physical plant inventory of active and abandoned rail corridors a review driven by interest in passenger rail and nonmotorized corridor interests A foundation has been set to more fully lever these valuable alignments in this country s most populous state This synthesis was undertaken to document current practices with respect to rail corridor preservation State departments of transportation DOTs selected metropolitan planning organizations commuter rail agencies short line holding companies and Class I rail carriers were all surveyed for information Response rates to the survey were moderate averaging 24% and overall supporting the notion that preservation of rail alignments is not a high priority issue in many jurisdictions A handful of state respondents however had a great deal of experience and valuable observations on rail preservation policies and could be said to have become experts on this subject through their dealings with several dozen rail corridors over the past two decades North Carolina Ohio and Pennsylvania DOTs each have serious well established rail sections and a history of successful preservation efforts      *Corridor Preservation* John J. Maiorana,1994 This synthesis will be of interest to transportation agency administrators planners attorneys environmental officials and engineers in federal state and local governments as well as to citizens interested in corridor preservation It is especially timely in view of the ISTEA provisions for corridor preservation although the requirements and conditions are changing This synthesis describes the state of the practice with

respect to the experience and status of corridor preservation for highways in the United States The report describes the many elements of the corridor preservation process including project development advance acquisition fee simple acquisitions and other options as well as environmental issues This report of the Transportation Research Board presents detailed information on acquisition techniques such as exactions subdivision control ordinances transfer of development rights purchase options and access management Detailed discussions of maps of reservation and legal issues such as land use law are also addressed In addition innovations in corridor preservation are highlighted and future research is suggested This synthesis also contains several case examples that illustrate a range of practice

*Designing Greenways* Paul Cawood Hellmund, Daniel Smith, 2013-03-05 How are greenways designed What situations lead to their genesis and what examples best illustrate their potential for enhancing communities and the environment Designing greenways is a key to protecting landscapes allowing wildlife to move freely and finding appropriate ways to bring people into nature This book brings together examples from ecology conservation biology aquatic ecology and recreation design to illustrate how greenways function and add value to ecosystems and human communities alike Encompassing everything from urban trail corridors to river floodplains to wilderness like linkages greenways preserve or improve the integrity of the landscape not only by stemming the loss of natural features but also by engendering new natural and social functions From 19th century parks and parkways to projects still on the drawing boards Designing Greenways is a fascinating introduction to the possibilities and pitfalls involved in these ambitious projects As towns and cities look to greenways as a new way of reconciling man and nature designers and planners will look to Designing Greenways as an invaluable compendium of best practices

**Corridor Management** Kristine Williams, 2000 This synthesis report will be of interest to department of transportation administrators and transportation planning right of way economic development and environmental planning staffs as well as to the consultants that work with them It would also appeal to regional and local government officials and staff as well as to the private sector It summarizes information about corridor management policies and programs at the federal state and local levels An effort was made to select a diversity of methods and programs for the broadest treatment of the subject The synthesis focuses more on roadway corridors than on transit or greenway corridors but much of the information provided is relevant to any corridor management effort This report examines state policies and programs techniques applied and coordination issues A series of case studies provides more detailed study This report of the Transportation Research Board documents successful partnerships It presents examples of transportation agencies working together proactively with local governments and other stakeholders to achieve more cost effective and comprehensive solutions to transportation problems

**Placer Parkway Corridor Preservation from State Route 70/99 to State Route 65, Sutter and Placer Counties**, 2009 *East Contra Costa County Habitat Conservation Plan and Natural Community Conservation Plan*, 2006

**People and Predators** Defenders of Wildlife, 2012-06-22 Carnivores provide innumerable ecological benefits and play a unique role

in preserving and maintaining ecosystem services and function but at the same time they can create serious problems for human populations. A key question for conservation biologists and wildlife managers is how to manage the world's carnivore populations to conserve this important natural resource while mitigating harmful impacts on humans. In *People and Predators*, leading scientists and researchers offer case studies of human carnivore conflicts in a variety of landscapes including rural, urban, and political. The book covers a diverse range of taxa, geographic regions, and conflict scenarios, with each chapter dealing with a specific facet of human carnivore interactions and offering practical, concrete approaches to resolving the conflict under consideration. Chapters provide background on particular problems and describe how challenges have been met or what research or tools are still needed to resolve the conflicts. *People and Predators* will help readers to better understand issues of carnivore conservation in the 21st century and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles. *Connectivity*

Conservation Kevin R. Crooks, M. Sanjayan, 2006-11-02 One of the biggest threats to the survival of many plant and animal species is the destruction or fragmentation of their natural habitats. The conservation of landscape connections where animals, plants, and ecological processes can move freely from one habitat to another is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management. *Central Corridor Project, Ramsey County*, 2009 **The Practical Streambank Bioengineering Guide** Gary Bentrup, 1998

Clearinghouse Review, 2009 **Medicine Bow-Routt National Forests (N.F.), Bark Beetle Analysis**, 2002

**Mississippi River Corridor Study: Inventory of resources and significance** Mississippi River Corridor Study Commission (U.S.), 1996 In recognition of the Mississippi River's importance to the nation, Congress passed legislation in 1990 that established the Mississippi River Corridor Study Commission. Congress directed the commission to undertake a study to determine the feasibility of designating the river as a national heritage corridor. Congress also charged the commission with recommending methods for preserving and enhancing the unique natural, recreational, scenic, cultural, scientific, and economic resources of the corridor. *California Desert Conservation Area*, 1980
