United States. Congress,1996 Things American Jeffrey Trask,2011-11-29 American art museums of the Gilded Age were established as civic institutions intended to provide civilizing influences to an urban public but the parochial worldview of their founders limited their democratic potential Instead critics have derided nineteenth century museums as temples of spiritual uplift far removed from the daily experiences and concerns of common people But in the early twentieth century a new generation of cultural leaders revolutionized ideas about art institutions by insisting that their collections and galleries serve the general public Things American Art Museums and Civic Culture in the Progressive Era tells the story of the civic reformers and arts professionals who brought museums from the realm of exclusivity into the progressive fold of libraries schools and settlement houses Jeffrey Trask s history focuses on New York s Metropolitan Museum of Art which stood at the center of this movement to preserve artifacts from the American past for social change and Americanization Metropolitan trustee Robert de Forest and pioneering museum professional Henry Watson Kent influenced a wide network of fellow reformers and cultural institutions Drawing on the teachings of John Dewey and close study of museum developments in Germany and Great Britain they expanded audiences changed access policies and broadened the scope of what museums collect and display They believed that tasteful urban and domestic environments contributed to good citizenship and recognized the economic advantages of improving American industrial production through design education Trask follows the influence of these people and ideas through the 1920s and 1930s as the Met opened its innovative American Wing while simultaneously promoting modern industrial art Things American is not only the first critical history of the Metropolitan Museum The book also places museums in the context of the cultural politics of the progressive movement illustrating the limits of progressive ideas of democratic reform as well as the boldness of vision about cultural capital promoted by museums and other cultural institutions *By Design 2* ,1989 *Historic Preservation in the USA* Karolin Frank,2013-03-09 Since the 1960s public attention has been drawn increasingly towards the thematic link between historic preservation and urban planning Nowadays the organized historic preservation movement in the USA is more than a mere yearning for history it

represents an active and integral part of urban planning in US cities In order to approach these planning economic and social issues in the field of historic preservation this book analyzes a variety of interdisciplinary methods focusing on four selected historic districts within the central business districts of Philadelphia and Boston in the north and Charleston and Savannah in the south Crafting Preservation Criteria John H. Sprinkle, Jr.,2014-03-05 In 1966 American historic preservation was transformed by the passage of the National Historic Preservation Act which created a National Register of Historic Places Now comprising more than 1 4 million historic properties across the country the National Register is the official federal list of places in the United States thought to be worthy of preservation One of the fundamental principles of the National Register is that every property is evaluated according to a standard set of criteria that provide the framework for understanding why a property is significant in American history The origins of these criteria are important because they provide the threshold for consideration by a broad range of federal preservation programs from planning for continued adaptive use to eligibility for grants and inclusion in heritage tourism and educational programs Crafting Preservation Criteria sets out these preservation criteria for students explaining how they got added to the equation and elucidating the test cases that allowed for their use From artworks to churches from the fifty year rule to the historic scene students will learn how places have been historically evaluated to be placed on the National Register and how the criteria evolved over time Historic Preservation, Third Edition: An Introduction to Its History, Principles, and Practice (Third Edition) Norman Tyler,Ilene R.
