concerned This volume seeks to address the crucial question of how compliance with these agreements could be encouraged effectively without damaging the fragile political consensus that is emerging on environmental issues With extensive use of case studies Improving Compliance will make stimulating reading for all students and researchers working in this area as well as for anyone concerned about the effectiveness of international environmental measures **Controlling Global Warming** Christoph Böhringer, Michael Finus, Carsten Vogt, 2002-01-01 Global warming is widely considered to be one of the most serious environmental problems for current and future generations Governing Global Biodiversity Philippe G.
