**Design for Ecological Democracy** Randolph T. Hester, Jr., 2010-09-24 Shows how to combine the forces of ecological science and participatory democracy to design urban landscapes that enable us to act as communities are resilient rather than imperiled and touch our hearts Over the last fifty years the process of community building has been lost in the process of city building City and suburban design divides us from others in our communities destroys natural habitats and fails to provide a joyful context for our lives In Design for Ecological Democracy Randolph Hester proposes a remedy for our urban anomie He outlines new principles for urban design that will allow us to forge connections with our fellow citizens and our natural environment He demonstrates these principles with abundantly illustrated examples drawn from forty years of design and planning practice showing how we can design cities that are ecologically resilient that enhance community and that give us pleasure Hester argues that it is only by combining the powerful forces of ecology and democracy that the needed revolution in design will take place Democracy bestows freedom ecology creates responsible freedom by explaining our interconnectedness with all creatures Hester's new design principles are founded on three fundamental issues that integrate democracy and ecology enabling form resilient form and impelling form Urban design must enable us to be communities rather than zoning segregated enclaves and to function as informed democracies A simple bench at a centrally located post office for example provides an

opportunity for connection and shared experience Cities must be ecologically resilient rather than ecologically imperiled adaptable to the surrounding ecology rather than dependent on technological fixes Resilient form turns increased urban density for example into an advantage And cities should impel us by joy rather than compel us by fear good cities enrich us rather than limit us Design for Ecological Democracy is essential reading for designers planners environmentalists community activists and anyone else who wants to improve a local community     *The Value of Hawai'i* Craig Howes, Jonathan Kay Kamakawiwo'ole Osorio, 2010-07-02 How did we get here Three and a half day school weeks Prisoners farmed out to the mainland Tent camps for the migratory homeless A blinkered dependence on tourism and the military for virtually all economic activity The steady degradation of already degraded land Contempt for anyone employed in education health and social service An almost theological belief in the evil of taxes At a time when new leaders will be elected and new solutions need to be found the contributors to *The Value of Hawai'i* outline the causes of our current state and offer points of departure for a Hawai'i wide debate on our future The brief essays address a wide range of topics education the environment Hawaiian issues media tourism political culture law labor economic planning government transportation poverty but the contributors share a belief that taking stock of where we are right now what we need to change and what we need to remember is a challenge that all of us must meet Written for a general audience *The Value of Hawai'i* provides a cluster of starting points for a larger community discussion of Hawai'i that should extend beyond the choices of the ballot box this year Contributors Carlos Andrade Chad Blair Kat Brady Susan M Chandler Meda Chesney Lind Lowell Chun Hoon Tom Coffman Sara L Collins Marilyn Cristofori Henry Curtis Kathy E Ferguson Chip Fletcher Dana Naone Hall Susan Hippensteele Craig Howes Karl Kim Sumner La Croix Ian Lind Melody Kapilialoha MacKenzie Mari Matsuda Davianna McGregor Neal Milner Deane Neubauer Jonathan Kay Kamakawiwo'ole Osorio Charles Reppun John P Rosa D Kapua ala Sproat Ramsay Remigius Mahealani Taum Patricia Tummons Phyllis Turnbull Trisha Kehaulani Watson     *The Takings Issue* Robert Meltz, Dwight Merriam, Rick Frank, 1998-12 As challenges to land use and environmental controls by landowners and the property rights movement have become more frequent the concept of takings government action that excessively limits a property owner's use of private land has become both increasingly familiar to the public and increasingly problematic for planners local officials and anyone involved with making day to day decisions about land use A vast and diverse body of case law has come into existence over the past several decades and the controversy generated by recent legal decisions has resulted in a significant level of ideological bias in much of what has been written on the topic This volume is an objective and authoritative examination that considers all aspects of the takings issue It is a much needed guide and overview that introduces and explains issues surrounding regulatory takings on the local state and federal level for anyone involved with private land and government limitation of its permissible use The authors describe where the law is now predict where it might go in the future and review conflict reducing solutions to a variety of situations They condense an immense amount of

information into a clear and accessible format making the book equally valuable for lawyers and non lawyers alike The Takings Issue addresses procedural hurdles involved in getting a takings issue heard by a court examines what does and does not constitute a taking and considers the remedies available to landowners involved in takings actions It treats concerns such as zoning dedications and exactions subdivision platting and other local issues in some detail and also considers state and federal issues involving industrial site approval endangered species and wetlands protection restrictions on access to resources on federal lands and other topics The book is an essential reference for planners land use lawyers developers and students of planning and law as well as for policymakers and citizens involved with takings issues     Planning in the USA J.
