Pressing Questions Issue :

Dealing with Bioethical Issues in a Globalized World Joris Gielen, 2020-01-09 This book addresses the complexity of talking about normativity in bioethics within the context of contemporary multicultural and multi religious society It offers original contributions by specialists in bioethics exploring new ways of understanding normativity in bioethics In bioethical publications and debates the concept of normativity is often used without consideration of the difficulties surrounding it whereas there are many competing claims for normativity within bioethics Examples of such competing normative bioethical discourses can be perceived in variations and differences in bioethical arguments within individual religions and the opposition between bioethical arguments from specific religions and arguments from bioethicists who do not claim religious allegiance We also cannot merely assume that a Western understanding of normative bioethics will be unproblematic in bioethics in non Western cultures and religions Through an analysis of normativity in Christian Hindu Buddhist Islamic and Jewish bioethics the book creates awareness of the complexity of normativity in bioethics The book also covers normative bioethics outside an explicitly religiously committed context and specific attention is paid to bioethics as an interdisciplinary endeavor It reveals how normativity relates to empirical and global bioethics which challenges it faces in bioethics in secular pluralistic society and how to overcome these By doing that this book fills an important gap in bioethics literature

Issues in Psychotherapy Research Michel Hersen, Alan S. Bellack, 2013-11-21 Psychotherapy research is undoubtedly one of the most puzzling diverse complex controversial and multidimensional areas tackled by clinical psychologists psychiatrists and psychiatric social workers The numerous theoretical methodological and clinical research issues dealt with by workers in the field have increased exponentially in the past three decades To do full justice to the area monographs in each of the specific subareas would be warranted In this volume we as editors have endeavored to present the student and interested professional and practitioner with an understanding of the most salient issues and trends confronted by the psychotherapy researcher In order to accomplish this task we asked our colleagues who are experts in their respective areas to share their current thinking with us and with you the readers Thus many theoretical viewpoints are represented with none having a monopoly over the others This is as it should be given the data collected by clinical researchers at this time We have also attempted to capture the excitement that has permeated the field in the past 30 years or so

Vital Issues in the Inerrancy Debate F. David Farnell, Norman L. Geisler, Joseph M. Holden, William C. Roach, Phil Fernandes, 2016-01-14 The inerrancy of God's Word has been attacked throughout church history Today's assaults are unique since neo evangelicals now surrender to post modernistic ideas of history and historical critical ideologies that assault this vital doctrine They seek to redefine the orthodox meaning of inerrancy Since the signing of the Chicago Statements troubling signs have once again appeared in recent years among many who either did not fight the battles for the inerrancy of Scripture as did the International Council on Biblical Inerrancy or who do not remember the troubling times that caused their development The nature and definition of

inerrancy are now being changed to include ideas of fallibility History is forgotten The need arises for sounding the alarm for Vital Issues in Inerrancy Evangelical schools and churches that broke away earlier to defend inerrancy surrender now to academic prestige and scholarly fads instead of faithfulness to God's inerrant Word The contributors pray that the Lord will raise up a new generation with the spiritual fervency of the International Council on Biblical Inerrancy to uphold the inerrancy of God's Word Isaiah 40:8 The grass withers the flower fades But the word of our God stands forever

Emerging Issues in Prison Health Bernice S. Elger, Catherine Ritter, Heino Stöver, 2016-08-05 This volume recognizes and addresses the health care issues of prisoners to establish best practices and to learn about approaches to these challenges from around the world It presents new evidence on several emerging and classical prison health issues The first goal of this volume is to address emerging issues related to health in prison Second it presents the most recent research based evidence and translates it to the practice The third goal is that it allows for sufficient diversity while also incorporating updates of some important already recognized prison health The volume discusses prisons and the life and well being of prisoners and staff after growing problems as drug misuse incl tobacco smoking infectious diseases HIV AIDS hepatitis STIs and TB psychiatric problems inadequate and unhealthy living conditions incl nutrition overcrowding of prisons These are addressed adequately in order to meet the international requirements of equivalence of health care The scope of this volume is at the same type specific and diverse enough to cover the interests of a large audience that includes many types of practitioners involved in health related issues in the field of prison health care such as psychologists nurses and prison administration officers responsible for health care legal professionals and social workers

Key Issues in Bioethics Ralph Levinson, Michael Reiss, 2003-12-16 Young people are increasingly being exposed to the huge and complex ethical dilemmas involved in issues such as genetic modification animal rights and cloning and they are bringing their views into the classroom But how can teachers be sure they are sufficiently well informed to help their pupils make sense of the diverse and emotive arguments surrounding these issues This book holds the answer Written by leading ethicists scientists and technologists it offers a balanced and jargon free guide to such highly debated topics as cloning in vitro fertilisation genetic screening and genetic engineering farm animal welfare the use of animals in medical experiments Written specifically for the non specialist teacher or lecturer this book offers suggestions on how to approach the teaching of bioethics and provides useful sources of further information It may also be of interest to undergraduates on science courses

Theoretical and Research Issues in Africana Studies James E. Turner, 2014-08-01 The year of 1980 marked a pivotal turning point in the American political landscape the electoral victory of presidential candidate Ronald Reagan the beginnings of the public hysteria and eventual legislative dismantling of affirmative action and other civil rights initiatives the dawn of the ruthless reign of neo conservatism and in some ways serving as the glue the ascent of neo liberalism as the prevailing ideology and standard logic of viewing and ordering the world Some thirty five years later it is almost difficult to remember a world and more precisely a

moment in United States history when these things were not so dominant When thinking about the lasting impact of that moment David Harvey writes Future historians may well look upon the years 1978 1980 as a revolutionary turning point in the world s social and economic history revolutionary impulses seemingly spread and reverberated to remake the world around us in a totally different image In short this was an instance of profound transformation it was the dawn of the counterrevolution By no means immune to the changes in the larger political landscape Black activists and intellectuals also felt the ground moving beneath their feet in 1980 as many would gradually shift from an all out advance towards liberation to a posture concerned with what James Turner described as the preservation of the modest gains made by African Americans over the last decade The previous decade witnessed an obvious waning in the Black liberation movement a slew of high profile manhunts arrests court cases and outright criminalizing of radical activists the unearthing of Cointelpro the blooming of the liberation movement in Southern Africa a taxing debate around various articulations of Marxism and Black nationalism the full swing of feminism and a full decade of Africana Studies which also meant institutionalized space to foster such discussions It was these changing times that provided the context for the important gathering of Black activists and intellectuals in Ithaca New York during September 1980 at the Africana Studies and Research Center at Cornell and the content for this book Bound together by the dual purposes of both assessing the road traveled and preparing for the journey ahead the ensemble in attendance gathered to ponder the Next Decade as the conference theme spelled out plainly A quick glance at the conference s list of attendees demonstrates the extraordinary sphere of activity that was the Africana Studies and Research Center at Cornell Participants and attendees at this historic meeting included Toni Cade Bambara Lerone Bennett Johnella Butler John Henrik Clarke Gayla Cook Louis Farrakhan Hoyt Fuller Ewart Guinier Vincent Harding Robert Harris Stephen Henderson Robert Johnson George Kent George Lamming Tilden Lemelle Bernard Magubane Manning Marable William Nelson William Sales Michael Thelwell Bettye Collier Thomas Eleanor Traylor Ivan Van Sertima Ronald Walters Shirley Weber Sylvia Wynter Howard Dodson William Strickland and two of the visual artists featured in this book David Bradford and Bertrand Phillips This book is both a contribution to the historiography of the Black African Studies movement and an intellectual treasure representing the ideas and visions of many of the best minds at a crucial juncture in the African world

Children and Families at Risk New Issues in Integrating Services OECD,1999-01-13 This book examines the necessity to provide greater co ordination among family and educational services to improve their efficiency and effectiveness and to provide a seamless support to meet the holistic needs of students and their families

The Palgrave Handbook on the Problem of Animal Suffering in the Philosophy of Religion B. Kyle Keltz,2025-07-28 Atheists argue that animal pain disease suffering and death cause a problem for theism because they believe that an all knowing all powerful and all good God would not use millions of years of animal suffering just to make a world suitable for humans Animal suffering was not a concern for theism through the medieval period but it has been increasingly discussed in philosophy of religion

since modern times and there is especially a large and growing amount of literature on this subject that has been published in the last few decades This handbook serves as a guide for those interested in the literature on the problem by bringing together experts in the philosophy of religion theology environmental ethics and the philosophy of animal minds It not only presents major formulations of the problem of animal suffering and major theodicies but it also discusses metaethical issues regarding animal suffering the question of animal consciousness and self awareness and their implications for animal suffering and what implications available theodicies might have for animal ethics *Financier* ,1915 **Issues in Psychoanalysis and Psychology** Louis S. Berger,2002 The thirty four journal articles book reviews and conference papers collected in this volume were written over the same period of time as the author s three clinical monographs Psychoanalytic theory and clinical relevance Analytic Press 1985 Substance abuse as symptom Analytic Press 1991 and Psychotherapy as praxis Trafford 2002 While the books provide broad critiques of clinical societal and philosophical issues in psychotherapy psychoanalysis and general psychology the papers enlarge on specific subtopics including some not addressed in the monographs The chapters in the present work are grouped into four subject areas Part I conceptual frameworks Part II psychotherapy and psychoanalysis Part III society and culture and Part IV general psychology Individual topics explored under these rubrics span a wide diverse spectrum including neonatal models personality theory psychoanalytic defense analysis the false memory syndrome physical reductionism in psychiatry ontology of language mental health policies in the work place psychological testing in forensic settings national drug policy and conflict resolution These more narrowly focused papers collectively complement and further illuminate the general critiques presented in the author s previous books Most of the separate Parts and individual Chapters are preceded by new Introductions which were written specifically for this collection Great Leaders and National Issues of 1896 Edward Sylvester Ellis,Thomas Brackett Reed,William Lyne Wilson,John Sherman,Jacob Kendrick Upton,1896 *Bias Challenges in International Commercial Arbitration* Sam Luttrell,2009-01-01 Shows how dirty challenge tactics are made viable primarily by the prevalence of a judicially derived test for bias which focuses on appearances rather than facts and He argues that the most commonly used test of bias the reasonable apprehension test makes it easy to allege a lack of impartiality and independence Medicare Select and Medicare Managed Care Issues United States. Challenges and Choices James A. Holstein, Gale Miller, The social constructionist perspective has revolutionized the way that social scientists investigate social problems Constructing Social Problems Spector and Kitsuse 1977 2001 offered the guiding statement of the approach which both transformed and revitalized the sociology of social problems propelling it into a quarter century of exciting and innovative empirical research John Kitsuse and Malcolm Spector challenged conventional approaches to the field they insisted on treating social problems as social constructions as the products of claims making and constitutive definitional processes The purpose of this book is to highlight contemporary challenges to the social constructionist perspective on social problems In 1993 two collections of essays Reconsidering Social Constructionism Debates in Social Problems Theory Holstein and Miller 1993 and Constructionist Controversies Issues in Social Problems Theory Miller and Holstein 1993 brought a wide variety of constructionist challenges into focus Challenges and Choices attempts to distill these debates and offers some compelling suggestions for how challenges may be met and where constructionist studies might proceed in the future While each of the essays in this volume deeply appreciates the constructionist approach each of them points to issues and choices that social constructionists must confront if the perspective is to continue to be a vital part of ongoing debates on social problems The essays critique previous constructionist formulations make suggestions for advancing expanding or diversifying the constructionist agenda and challenge the perspective to move in new directions They remind us that social constructionism is an ongoing not a finished product and the essays point to some of the choices available to social constructionists in moving their projects into new even uncharted territories James A Holstein and Gale Miller are professors in the Department of Social and Cultural Sciences at Marquette University
