Shock to the System Michael K. Miller, 2021-07-20 How violent events and autocratic parties trigger democratic change How do democracies emerge Shock to the System presents a novel theory of democratization that focuses on how events like coups wars and elections disrupt autocratic regimes and trigger democratic change Employing the broadest qualitative and quantitative analyses of democratization to date Michael Miller demonstrates that more than nine in ten transitions since 1800 occur in one of two ways countries democratize following a major violent shock or an established ruling party democratizes through elections and regains power within democracy This framework fundamentally reorients theories on democratization by showing that violent upheavals and the preservation of autocrats in power events typically viewed as antithetical to democracy are in fact central to its foundation Through in depth examinations of 139 democratic transitions Miller shows how democratization frequently follows both domestic shocks coups civil wars and assassinations and international shocks defeat in war and withdrawal of an autocratic hegemon due to autocratic insecurity and openings for opposition actors He also shows how transitions guided by ruling parties spring from their electoral confidence in democracy Both contexts limit the power autocrats sacrifice by accepting democratization smoothing along the transition Miller provides new insights into democratization s predictors the limited gains from events like the Arab Spring the best routes to democratization for long term stability and the future of global democracy Disputing commonly held ideas about violent events and their effects on democracy Shock to the System offers new perspectives on how regimes are transformed

The New Authoritarianism in Latin America David Collier, Fernando Henrique Cardoso, Joint Committee on Latin American Studies, 1979 While one of the most important attempts to explain the rise of authoritarian regimes and their relationship to problems of economic development has been the bureaucratic authoritarian model there

has been growing dissatisfaction with various elements of this model In light of this dissatisfaction a group of leading economists political scientists and sociologists was brought together to assess the adequacy of the model and suggest directions for its reformulation This volume is the product of their discussions over a period of three years and represents an important advance in the critique and refinement of ideas about political development Part One provides an overview of the issues of social science analysis raised by the recent emergence of authoritarianism in Latin America and contains chapters by David Collier and Fernando Henrique Cardoso The chapters in Part Two address the problem of explaining the rise of bureaucratic authoritarianism and are written by Albert Hirschman Jose Serra Robert Kaufman and Julio Coder In Part Three Guillermo O Donnell James Kurth and David Collier discuss the likely future patterns of change in bureaucratic authoritarianism opportunities for extending the analysis to Europe and priorities for future research The book includes a glossary and an extensive bibliography

Authoritarianism and Corporatism in Latin America James Malloy, 2010-11-23 Since the mid 1960s it has been apparent that authoritarian regimes are not necessarily doomed to extinction as societies modernize and develop but are potentially viable if unpleasant modes of organizing a society s developmental efforts This realization has spurred new interest among social scientists in the phenomenon of authoritarianism and one of its variants corporatism The sixteen previously unpublished essays in this volume provide a focus for the discussion of authoritarianism and corporatism by clarifying various concepts and by pointing to directions for future research utilizing them The book is organized in four parts a theoretical introduction discussions of authoritarianism corporatism and the state comparative and case studies and conclusions and implications The essays discuss authoritarianism and corporatism in Argentina Bolivia Brazil Chile Colombia the Dominican Republic Mexico Peru Uruguay and Venezuela

Democracy Without Decency William M. Epstein, 2013-05-31 The conservative attacks on the welfare system in the United States over the past several decades have put liberal defenders of poverty relief and social insurance programs on the defensive In this no holds barred look at the reality of American social policy since World War II William Epstein argues that this defense is not worth mounting that the claimed successes of American social programs are not sustained by evidence Rather than their failure being the result of inadequate implementation or political resistance stemming from the culture wars these programs and their built in limitations actually do represent what the vast majority of people in this country want them to be However much people may speak in favor of welfare the proof of what they really want is in the pudding of the social policies that are actually legislated The stinginess of America s welfare system is the product of basic American values rooted in the myth of heroic individualism and reinforced by a commitment to social efficiency the idea that social services need to be minimal and compatible with current social arrangements

Midlarsky, 2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies

Peasant Cooperation and Capitalist Expansion in Central Peru Norman Long, Bryan R. Roberts, 2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant

movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of these studies Reinventing the State Carol Wise, 2003-01-17 Publisher Description The State, Industrial Relations and the Labour Movement in Latin America Jean Carriere, Nigel Haworth, Jacqueline Roddick, 1989-06-18 An examination of the role of the Latin American State in the day to day practice of collective bargaining and the conflicts surrounding it It also provides a study of the social and political role of labour and the impact of today s economic crisis on existing patterns of organization **Struggle in the Andes** Howard Handelman, 2014-11-06 A massive land seizure movement first erupted in Peru in 1958 and spread across the Andean highlands in 1963 1964 Several hundred peasant communities in the Peruvian Andes occupied neighboring haciendas in an attempt to retake lands they felt had been stolen from them over the years Hacienda peasants also participated in this movement forming peasant sindicatos unions to improve their labor conditions The land seizure movement brought with it an upsurge in community political mobilization Throughout the highlands village leaders banded together in regional federations often allying themselves with progressive or radical urban groups Radical activists from labor unions and university student groups joined with indigenous peasant leaders breaking down the highland peasantry s traditional isolation from the political system *Struggle in the Andes* is an analysis of the causes and consequences of extensive social and political mobilization among Peru s peasant population in the 1960s In addition to describing the growth of the peasant land movement Howard Handelman investigates the social and economic conditions that contributed to rural unrest Using data that he collected in forty one diverse highland communities Handelman examines the correlates of peasant political activity concluding that land seizures in the traditional southern sierra had different origins and political implications than did unrest in the more socioeconomically modernized central highlands The data suggest a model of peasant mobilization that calls into question prevailing scholarly hypotheses on the relationships between modernization peasant political mobilization and radicalization Handelman discusses the land reform program and the accompanying rural mobilization that was being implemented by Peru s reformist military regime Using his model of peasant mobilization he speculates on the possible effects of the government s contemporary programs on future peasant political behavior *The Political Economy of Peru 1956-78* E.
