Coleman,Morton Deutsch,2015-01-21 Commemorating

Morton Deutsch's 95th birthday this book presents ten major texts by this highly respected social psychologist on war and peace. This first volume presents Deutsch in his role as a leading social science activist on issues of war and peace, writing papers, making speeches, and participating in demonstrations. After serving in the U.S. Air Force during World War II and being awarded two Distinguished Flying Cross medals as a psychologist, he was determined to work for a more peaceful world. Influenced by Kurt Lewin, who believed that nothing was as practical as a good theory, Deutsch pursued theoretical work on such issues as cooperation, competition, conflict resolution, and social justice with regard to issues of war and peace. As President of the Society for the Study of Peace, Conflict, and Violence, the Society for the Psychological Study of Social Issues, and the International Society of Political Psychology, he helped to foster social science efforts to make for a more peaceful world.

Importance of United Public Opinion on Public Issues James Edward Murray, 1951 *Preventing Deadly Conflict* I. William Zartman, 2015-10-29 Conflict is inherent to all human and inter-state relations, but it is not inevitable. Since the end of the Cold War, the prevention of conflict escalation into violence through management and resolution has become a fundamental objective of the international system. So how does prevention work when it works, and what can be done when tried and tested practices fail? In this book, I. William Zartman offers a clear and authoritative guide to the key challenges of conflict prevention and the norms, processes, and methods used to dampen and diffuse inter- and intra-state conflict in the contemporary world. Early-stage techniques including awareness, de-escalation, stalemate ripening, and resolution are explored in full, alongside the late- or crisis-stage techniques of interruption, separation, and integration. Prevention, he argues, is a battle that is never won; there is always more work to be done. The search for prevention necessary but still imperfect continues into new imperatives, new mechanisms, new agents, and new knowledge, which this book helps discover and apply.
