S. Department of Health and Human Services, 2012-07-10 Suicide exacts an enormous toll from the American people Our Nation loses 30 000 lives to this tragedy each year another 650 000 receive emergency care after attempting to take their own lives The devastating trauma loss and suffering is multiplied in the lives of family members and friends This document National Strategy for Suicide Prevention Goals and Objectives for Action lays the foundation of our Nation s strategy to confront this serious public health problem At this document s source are countless dedicated individuals representing every facet of our Nation s communities They include representatives to a 1993 United Nations World Health Organization Conference who played key roles in establishing guidelines for national suicide prevention strategies They include the passionate grassroots activists whose work stimulated Congressional Resolutions declaring suicide prevention a national priority and calling for our own national strategy They include dedicated public servants and private individuals who jointly organized and participated in the first National Suicide Prevention Conference in 1998 to consolidate a scientific base for this critical endeavor These people and their efforts led directly to publication of the Surgeon General s Call to Action to Prevent Suicide 1999 with its most important recommendation the completion of the National Strategy for Suicide Prevention After listening to the concerns of the American people Government leaders helped bring stakeholders together in a shining example of public private collaboration to achieve this major milestone in public health Those who have invested their hearts and minds in this effort believe it effectively points the way for organizations and individuals to curtail the tragedy of suicide and suicidal behavior Though it does not specify all the details it provides essential guidance and suggests the fundamental activities that must follow activities based on the best available science Nearly half of the States are engaged in suicide prevention and many have already committed significant resources to implement programs Their leadership in evaluating the effectiveness of these programs will help guide the efforts of States that follow in their paths Most of these plans recognize that much of the work of suicide prevention must occur at the community level where human relationships breathe life into public policy American communities are also home to scores of faith based and secular initiatives that help reduce risk factors and promote protective factors associated with many of our most pressing social problems including suicide As you read further keep in mind that the National Strategy for Suicide Prevention is not the Surgeon General s strategy or the Federal government s strategy rather it is the strategy of the American people for improving their health and well being through the prevention of suicide *Encyclopedia of Biomedical Gerontology*
