Principles Of Environmental And Resource Economics A Guide For Students And Decisionmakers:

Principles of Environmental and Resource Economics Henk Folmer, H. Landis Gabel, 1995 *Handbook of Environmental and Resource Economics* Jeroen C. J. M. Van den Bergh, 2002-01-01 This major reference book comprises specially commissioned surveys in environmental and resource economics written by an international team of experts. Authoritative yet accessible, each entry provides a state of the art summary of key areas that will be invaluable to researchers, practitioners, and advanced students.

Principles of Environmental and Resource Economics Henk Folmer, H. Landis Gabel, 1995 The economic causes of environmental and resource problems are the major theme of the first part of this volume, which also discusses links to such important areas as growth theory, national accounting, and public policy making. The goals and principles of environmental policy are addressed in the second part, which provides a comprehensive overview of the various instruments applied in practice.

Environmental science : understanding, protecting, and managing the environment in the Baltic Sea region Lars Rydén, Pawel Migula, Magnus Andersson, 2003

The International Yearbook of Environmental and Resource Economics 2005/2006 Henk Folmer, Thomas H. Tietenberg, 2005-01-01 The International Yearbook of Environmental and Resource Economics presents articles which are surveys of current issues in this research area where literature is abundant. As every year, we recommend the present yearbook to keep up with the developments of this literature.

Michel Griffon Quarterly Journal of International Agriculture The Yearbook provides a comprehensive overview of cutting edge issues in environmental and resource economics. The expert contributors address some of today's most pressing environmental topics, including issues in water pricing, reforms, spatial environmental policy, environmental equity, and the siting of hazardous waste facilities; strategies to conserve biodiversity; corporate sustainability; the double dividend hypothesis; environmental taxes; valuing environmental changes in the presence of risk. The Yearbook will provide economists, scholars, and practitioners working in environmental and resource economics with a comprehensive overview of the cutting edge issues in the field.

Clean and Competitive Rupert Howes, Jim Skea, Bob Whelan, 2013-11-05 Reconciling wealth creation and environmental care is one of the key challenges in the pursuit of sustainable development. Companies considering greener modes of operation are mindful of their formal responsibilities to advance shareholders' interests. The age of globalization and intensified competition has increased disincentives to be green for its own sake. And yet a surprisingly high proportion of large companies have put in place environmental management regimes and invest considerable time and resources in them. However, the public continues to believe that these companies are failing to take their environmental responsibilities seriously, and campaigners are unimpressed with the results of industrial self-regulation. In short, there is a gulf in perception between industry and the consumer. Clean and Competitive explores the challenge of motivating industry to address environmental issues, drawing on work undertaken by Sussex University's Science Policy Research Unit (SPRU) and the Centre for the Exploitation of Science and Technology (CEST). The authors explore in detail

industrial responses to prominent environmental issues including climate change air quality water pollution waste minimization and product recycling They assess various approaches to environmental problems such as traditional regulation partnership voluntary agreements and market based instruments Finally they recommend practical ways forward for addressing an ever more complex environmental agenda This thoughtful and articulate text is recommended for students on environmental management courses policy makers and environmental managers within industry Operational
