[God's Strategy in Human History](#) Paul Marston, Roger Forster, 2001-07-01 Forster and Marston have delivered a stellar book that attempts to present an exegetical and Scriptural framework for the

content presented in the book Instead of beginning from a set of deductive theological assumptions and then attempting to support that system from Scripture Forster and Marston examine Scripture and attempt to build their case directly from the text The authors unabashedly admit that their views are very similar to those of Arminian and Wesleyan traditions but they state in the beginning of the book that they do not want to be labeled with these names but want to construct a theology that is in line with the teachings of the first 300 years of Christianity Anyone who reads their appendix will come to understand that the teachings presented in this book were the orthodox consensus of the early Church for the first 300 years and that it was Augustine who introduced serious deviations into the mainstream orthodox Christianity of his time Forster and Marston begin by describing the battle that is being waged between God and the spiritual forces that oppose Him They examine the book of Job and see how this relates to the overall struggle Then the authors examine the 9th chapter of Romans to see if this book is dealing with election and individual destinies or God's actions within human history The authors do an excellent job of arguing for their opinion that this chapter is speaking about God's involvement in human history and it deals with God's choosing of one nation or individual over another nation or individual to accomplish His purpose Other sections of interest in this book are the sections on foreknowledge and predestination and the chapters on faith and works The section on faith and works was particularly interesting because it relies on much of the teaching of the new perspective which has shed much light on how a 1st century Palestinian Jew would have approached Scriptural issues The research argumentation and exegesis in this book are solid so every chapter is excellent but the ones mentioned above were two of my favorites Amazon.com

Naval strategy compared and contrasted with the principles and practice... Alfred Thayer Mahan, 1911 **Naval Strategy Compared and Contrasted with the Principles and Practice of Military Operations on Land** Alfred Thayer Mahan, 1911 *The Art and Practice of Military Strategy* George Edward Thibault, 1984 *Sailors, Statesmen and the Implementation of Naval Strategy* Agustín Guimerá, Richard Harding, Agustín Guimerá Ravina, 2024 Explores the varied relationship between political leaders and naval experts from the 16th to 21st centuries The shaping of national defence strategies is particularly difficult in the case of navies Few political leaders have naval experience in contrast to the case of armies where political leaders and army commanders have often shared similar social and professional backgrounds Bringing together historical examples from Britain the United States Spain and France the book provides insights into this key relationship The authors highlight factors which have made for successful relationships between political leaders and naval experts showing how changing circumstances have affected the dialogue and underlines the importance of good exchange of knowledge expertise and understanding for successful policy making and strategic outcomes Sea power continues to be crucial in the present world's increasingly unstable geopolitical situation the mutual exchange of expertise between naval experts and political leaders is as important as ever and the risk of political sea blindness remains high This book's historical examples provide good guidance on how to manage the relationship between political leaders and naval experts well

Introduction to Military History Robert Greenhalgh Albion, 1929 *Military Strategy* Amelia Khatri, AI, 2025-02-17
