Prints Illustrateds Six Centuries:

Harold Innis's History of Communications William J. Buxton, Michael R. Cheney, Paul Heyer, 2014-12-18 For decades media historians have heard of Harold Innis's unpublished manuscript exploring the history of communications but very few have had an opportunity to see it. In this volume editors and Innis scholars William J. Buxton, Michael R. Cheney, and Paul Heyer make widely accessible for the first time three core chapters from the legendary Innis manuscript. Here Innis 1894-1952 examines the development of paper and printing from antiquity in Asia through to 16th century Europe. He demonstrates how the paper printing nexus intersected with a broad range of other phenomena including administrative structures, geopolitics, militarism, public opinion, aesthetics, cultural diffusion, religion, education, reception, production processes, technology, labor relations, and commerce, as well as the lives of visionary figures. Buxton, Cheney, and Heyer knit the chapters into a cohesive narrative and help readers navigate Innis's observations by summarizing the heavily detailed factual material that peppered the unpublished manuscript. They provide further context for Innis's arguments by adding annotations, references, and pertinent citations to his other writings. The end result is both a testament to Innis's status as a canonical figure in the study of communication and a surprisingly relevant contribution to how we might think about the current sea change in all aspects of social, cultural, political, and economic life stemming from the global shift to digital communication.

Art Information and the Internet Lois Swan Jones, 2013-12-16 In the first book of its kind, art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats: print sources, CD-ROMs, documentary videos, and microfiche sets to produce excellent research results. The book is divided into three sections: Basic Information, Formats, Types of Websites, and How to Find Them, and How to Use Web Information. Jones discusses the strengths and limitations of Websites; scholarly and basic information resources are noted, and search strategies for finding pertinent Websites are included. *Art Information and the Internet* also discusses research methodology for studying art, historical styles, artists working in various media, individual works of art, and non-Western cultures, as well as art education, writing about art, problems of copyright, and issues concerning the buying and selling of art. This title will be periodically updated.

Illustrated Religious Texts in the North of Europe, 1500-1800 Feike Dietz, Adam Morton, Lien Roggen, 2016-12-05 In recent years many historians have

argued that the Reformation did not as previously thought hamper the development of Northern European visual culture but rather gave new impetus to the production diffusion and reception of visual materials in both Catholic and Protestant milieus This book investigates the crosscurrents of exchange in the realm of illustrated religious literature within and beyond confessional and national borders and against the background of recent insights into the importance of on the one hand material as well as on the other hand sensual and emotional aspects of early modern culture Each chapter in the volume helps illuminate early modern religious culture from the perspective of the production of illustrated religious texts to see the book as object a point at which various vectors of early modern society met Case studies together with theoretical contributions shed light on the ways in which illustrated religious books functioned in evolving societies by analysing the use re use and sharing of illustrated religious texts in England France the Low Countries the German States and Switzerland Interpretations based on points of material interaction show us how the most basic binaries of the early modern world Catholic and Protestant word and image public and private were disrupted and negotiated in the realm of the illustrated religious book Through this approach the volume expands the historical appreciation of the place of imagery in post Reformation Europe
