Priorities In Death Education Counseling:

Priorities in Death Education and Counseling Richard A. Pacholski, Charles A. Corr, 1982-12-01 **Death Anxiety Handbook: Research, Instrumentation, And Application** Robert A. Neimeyer, 2015-12-22 Presenting a broad coverage of this major area of studies on death and dying this book provides a systematic presentation of the six most widely used and best validated measures of death anxiety threat and fear These chapters consider the available data on the psychometric properties of each instrument and summarize research using them and also supply a copy of the instrument with scoring keys to facilitate their use In addition other chapters make use of the instrumentation by pursuing questions of applied significance in various health care settings nursing homes psychotherapy death education near death experiences persons with AIDS experiences of bereaved young adults An introductory chapter introduces the major philosophical and psychological theories of the causes and consequences of death anxiety in adult life and a closing chapter gives an overview of death education and how this affects attitudes towards death and dying **Handbook of Adolescent Death and Bereavement** David E. Balk, PhD, 2004-01-01 In this comprehensive handbook Charles Corr and David Balk improve our understanding of the challenges faced by adolescents when coping with death dying and bereavement The volume is organized into three parts Part I addresses specific issues involved in confrontations with death Part II focuses on the role of bereavement Part III explains specific therapeutic interventions for caregivers The authors introduce us to adolescence as a special time in the human life cycle a period quite separate from childhood and adulthood They establish normative adolescents and explain developmental tasks that are typical of early middle and late adolescence *Counseling Individuals With Life-Threatening Illness* Kenneth J. Doka, 2008-09-15 With a Foreword by Robert A Neimeyer PhD Where was this book when I was new as a counselor Fortunately it is here now and with all the scope depth resourcefulness and balance required for such situations Dr Robert Kastenbaum PhD This book will now be an indispensable resource for anyone who wants to understand counsel or otherwise help individuals with life threatening illnesses and their family members Charles A Corr PhD CT Without question this is the book you ll want your own caregivers to have read should you ever contend with life threatening illness Therese A Rando PhD BCETS BCBT Life threatening illness is not only a medical crisis it is a psychological social and spiritual crisis as well Also serious illness affects not only the patient but the patient s family Therefore the two major premises of this book are that care in life threatening illness must be holistic and it must be family centered Doka presents an insightful comprehensive guide for counselors social workers and health care professionals as they assist clients experiencing a serious illness The book builds on a model developed by the author based upon earlier work by Avery Weisman and E M Patterson Doka s model presents illness as a series of phases Prediagnostic individuals may decide how to handle troubling symptoms or to take certain diagnostic tests Diagnostic centered on the existential crisis posed by the diagnosis Chronic individuals must cope with the disease and treatment Recovery acknowledges that even when

individuals survive an encounter with life threatening illness there are still considerable issues that must be resolved

Terminal phase individuals deal with the inevitability of death In his discussion of each phase the author delineates specific tasks for patients to perform and the issues they must adapt to He also presents strategies for counselors and health care professionals to use with individuals in each phase of illness Living, Dying, Death, and Bereavement (Volume Two) David E. Balk,2020-10-21 This two volume book offers extensive interviews with persons who have made significant contributions to thanatology the study of dying death loss and grief The book s in depth conversations provide compelling life stories of interest to clinicians researchers and educated lay persons and to specialists interested in oral history as a means of gaining rich understandings of persons lives Several disciplines that contribute to thanatology are represented in this book such as psychology religious studies art literature history social work nursing theology education psychiatry sociology philosophy and anthropology The book is unique no other text offers such a comprehensive insightful and personal review of work in the thanatology field The salience of thanatology is obvious when we consider several topics including the aging demographics of most countries the leading causes of death the devastation of COVID 19 the realities of how most persons die the growth both of hospice and of efforts within medicine to ensure that a good death becomes the norm of medical practice and increases in the number of countries and states permitting physician assisted suicide This second volume includes conversations with 16 thanatologists a rich extensive bibliography an index of names and subjects and a biographical sketch of the author The experts interviewed in this volume include Danai Papadatou Holly Prigerson Jack Jordan Illene Cupit Heather Servaty Seib Irwin Sandler Simon Shimshon Rubin Carla Sofka Harold Ivan Smith and Phyllis Kosminsky
