The Armageddon of Architecture and Design Anthony Sully,2022-10-21 This book examines why there is a lack of humanity in current architecture that produces such ghastly environmental errors It brings together a selective study of past historical styles and works of art since primitive times in order to understand how the evolution of design was broken in the 20th century Current ideologies and philosophies of the day are examined to ascertain those elements which fuelled a modern architecture that is lacking in humanity and agreeable contextual co existence with our inherited communities It shows that the complex effervescence of evolutionary life with its joy communal celebratory nature and constructive creative urges is vulnerable from attack by these stronger alien forces of elimination and reductionism because their actions are by nature aggressive and dictatorially dominant This book will appeal to all those academics and professional stakeholders who care for the environment and wish to see more positive changes
