Radical Tectonics

Philip B. King

Radical Tectonics:

Radical Tectonics Annette W. LeCuyer, 2001 As a tendency toward formalism returns to architecture a number of practitioners are investigating the outer limits of tectonic expression Vanguard architects are extending the boundaries of conventional construction to respond specifically to programmatic and site requirements Capturing this dynamic work *Radical Tectonics* presents four practices whose buildings push poetic construction to new extremes All in their own way and according to local sensibility and conditions Gunther Behnisch Stuttgart Enric Miralles Barcelona Patkau Architects Vancouver and Mecanoo Delft focus on the art of construction and innovative craftsmanship From Behnisch's contextual awareness of particular social and political environments to Miralles's building as land form from Patkau's funky vernacular to Mecanoo's playful manipulation of program and landscape these studies confront architecture's very nature with vigor and provocation The work in *Radical Tectonics* champions the ingenuity of craft and the exploration of surface form and creative expression to set new benchmarks of spatial complexity for the twenty first century 4 X 4 a new series on contemporary international architecture Each title includes 4 concise architect profiles 16 influential projects a reference section

Introducing Architectural Tectonics Chad Schwartz, 2025-08-29 The second edition of *Introducing Architectural Tectonics* is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in over a dozen countries across the globe Germany Italy Burkina Faso the United States Chile Japan Bangladesh Mexico Spain Australia and more and designed by notable architects such as Tadao Ando Herzog de Meuron Kengo Kuma Peter Zumthor Xu Tiantian and Francis K r Although similarities do exist between the projects their distinctly different characteristics and range of interpretations of tectonic expression provide the most significant lessons to help you learn about tectonic theory This second edition has been updated to include the tectonic analysis of four new architectural precedents From Nigeria the Makoko Floating School by NL From Burkina Faso Lyc e Schorge by K r Architecture From Mexico the Matamoros Public Market by Colectivo C733 From China Quarry 8 by DnA_Design and Architecture Written in clear accessible language these investigations examine the poetic potential of architecture presenting lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office

Structures and Architecture. A Viable Urban Perspective? Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-08 *Structures and Architecture A Viable Urban Perspective* contains the research papers and prototype submissions 1448 pages presented at the Fifth International Conference on Structures and Architecture ICSA2022 Aalborg Denmark 6 8 July 2022 The contributions on creative and scientific aspects in the conception

and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this matter represent a critical blend of scientific technical and practical novelties in both fields Hence as part of the proceedings series Structures and Architecture the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable architecture of the urban environment The volumes of the series appear once every three years in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers practitioners and students including architects structural and construction engineers builders and building consultants constructors material suppliers planners urban designers anthropologists economists sociologists artists product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects

The Tectonics of North America Philip B. King, 1969
