Va** National Radio Astronomy Observatory (U.S.), 1973 *Library of Congress Catalog* Library of Congress, 1971 Beginning with 1953 entries for Motion pictures and filmstrips Music and phonorecords form separate parts of the Library of Congress catalogue Entries for Maps and atlases were issued separately 1953 1955 **Library of Congress Catalogs** Library of Congress, 1970 **Advanced Array Systems, Applications and RF Technologies** Nicholas Fourikis, 2000-05-31 Advanced Array Systems Applications and RF Technologies adopts a holistic view of arrays used in radar electronic warfare communications remote sensing and radioastronomy Radio frequency RF and intermediate frequency IF signal processing is assuming a fundamental importance owing to its increasing ability to multiply a system s capabilities in a cost effective manner This book comprehensively covers the important front end RF subsystems of active phased arrays so offering array designers new and exciting opportunities in signal processing This book provides an up to date record of existing systems from different applications explores array systems under development bridges the gap between textbook coverage of idealized phased arrays and practical knowledge of working phased arrays recognises the significance of cost to the realization of phased arrays discusses future advances in the field that promise to deliver even more affordable arrays intelligent or self focussing cohering arrays Engineers and scientists in the radar and RF technology industry will welcome the detailed description of array elements polarisers T R modules and beamformers in Advanced Array Systems Applications and RF Technologies This book is also appropriate for postgraduate and advanced undergraduate students in electronic engineering and for technical managers researchers and students in the fields of radioastronomy and remote sensing This book is a volume in the Signal Processing and its Applications series edited by Richard Green and Truong Nguyen Observational Cosmology M.N. Bremer, N. Jackson, I. Pérez-Fournon, 2012-12-06 Radio surveys play an important role in observational cosmology However until recently the surveys have been either of wide area but with low sensitivity or of small area with high sensitivity Both limit the kinds of cosmology that can be carried out with radio surveys This situation has been revolutionised in the past few years by the availability of new large area high sensitivity radio surveys at both low and high radio frequencies These significant improvements allow studies based on both the statistics of the surveys themselves and multiwavelength follow up of the galaxies and AGN responsible for the radio emission It is therefore an opportune time to summarise progress in this field with a workshop This book comprises the proceedings of the Observational Cosmology with the New Radio Surveys workshop held on Tenerife January 13 15 1997 Topics covered include lessons learned and important results from earlier surveys descriptions of some of the new surveys clusters of galaxies and large scale structure radio source evolution CMB studies gravitational lensing and multiwavelength studies of distant radio sources **Instrumentation and Techniques for Radio**

Astronomy Paul F. Goldsmith, 1988 **Radio Recombination Lines: 25 Years of Investigation** M.A. Gordon, Roman L. Sorochenko, 2012-12-06 Text no 1 Radio Recombination Lines RRLs discovered in the USSR in 1964 have become a powerful research tool for astronomers Available throughout the radio spectrum these lines carry information regarding the density temperature turbulence and velocity of thermal plasmas Their very existence shows the presence of thermal gas They also can carry information regarding magnetic fields if Zeeman splitting were to be detected Containing the proceedings of an IAU Colloquium celebrating the 25th anniversary of their detection this volume tells us what has happened since It contains the story of the detection of RRLs and reviews of many areas of physics of the interstellar gas from which stars form HII regions excited by newly formed stars planetary nebulae involving dying stars and the structure of our Milky Way and other galaxies reflecting the large scale morphology of the star formation process In addition there is an article describing modern laboratory studies of Rydberg atoms to probe the basic physics of atomic structure and articles describing the theory of collisions and radiation upon Rydberg atoms leading to observable effects to be used as diagnostic tools in astronomy This book focuses on the 25 years of astronomical research with radio recombination lines RRLs since their discovery in 1965 It covers a wide range of topics papers dealing with research into Rydberg atoms both in the laboratory and in the interstellar medium of our galaxy and others papers on the interaction of radiation and atomic systems as well as with the effects of inelastic collisions between these atoms and both ions and electrons It deals with astronomical observations of atoms with diameters ranging from 0.08 to 50 μm a size factor of 625 It deals with RRLs in absorption in emission and as true masers And it deals with plasmas with temperatures ranging from 10 to greater than 10⁴ kelvins and with an even greater range of volume densities Much new work is reported including low frequency RRLs discovered in 1980 and the maser RRLs from the star MWC349 discovered in 1989 The advent of aperture synthesis telescopes and large single element telescopes have made possible RRL studies with high angular resolution The sum total of the work reported here will make the volume a platform from which to search new horizons in RRL research Open Skies Kenneth I. Kellermann, Ellen N. Bouton, Sierra S. Brandt, 2020-06-29 This open access book on the history of the National Radio Astronomy Observatory covers the scientific discoveries and technical innovations of late 20th century radio astronomy with particular attention to the people and institutions involved The authors have made extensive use of the NRAO Archives which contain an unparalleled collection of documents pertaining to the history of radio astronomy including the institutional records of NRAO as well as the personal papers of many of the pioneers of U S radio astronomy Technical details and extensive citations to original sources are given in notes for the more technical readers but are not required for an understanding of the body of the book This book is intended for an audience ranging from interested lay readers to professional researchers studying the scientific technical political and cultural development of a new science and how it changed the course of 20th century astronomy With a Foreword by Ron Ekers Radio Recombination Lines M.A. Gordon, R.L. Sorochenko, 2009-01-10 This guide to the physics

and observations of Radio Recombination Lines from astronomical sources includes history theory applications 250 equations and 110 illustrations This soft cover edition contains corrections and updates from hardbound edition
