Taylor,A A Lubrecht,1999-07-01 The 25th Leeds Lyon Symposium on Tribology was held at the Institut des Sciences Appliquées de Lyon from 8-11th September 1998 Its central theme was Lubrication at the frontier the role of the interface and surface layers in the thin film and boundary regime This topic was chosen because it represents an important evolution of the research field The Symposium opened with a keynote address entitled Role of surface anchored polymer chains in polymer friction which described the processes taking place at the interface between solid and liquid The keynote address was followed by two invited lectures Firstly Fuel efficient engine oils additive interactions boundary friction and wear presented the industrial point of view on lubricant formulation and engine testing and its evolution The second lecture was entitled For establishment of a new EHL theory and stressed the need to extend the current EHL theory Beginning in 1974 The Leeds Lyon Symposia have now covered a wide range of topics The essential aim each year is to select a topic of current interest to tribologists and to contribute to further the advance of knowledge in selected fields *Terror on the High Seas* John Cox,2020-11-20 This book starts with a wonderful bonding vacation that concludes with the worst of all news This news will force John to reach deeper into himself than he ever has His attempt to find a new peace to replace his grief and sorrow seems to be unattainable It thrusts him into a terrifying adventure that tests his intellect physical limits and ability to survive in the most hazardous circumstances and finally to confront the peace source before his very eyes The question is whether he can recognize it He must accept the challenge and more than that can he keep evil from conquering him and those he loves This book has a little bit of Robinson Crusoe without a man Friday person He must help himself unassisted in life or death situations Don't miss the smart yacht and the innovations that confound the most inventive *Senate Documents* United States Senate,1872 **Structural Foundation Designers' Manual** W. G. Curtin,Gerry Shaw,Gary Parkinson,J. Golding,Norman Seward,2006-12-04 This manual for civil and structural engineers aims to simplify as much as possible a complex subject which is often treated too theoretically by explaining in a practical way how to provide

uncomplicated buildable and economical foundations It explains simply clearly and with numerous worked examples how economic foundation design is achieved It deals with both straightforward and difficult sites following the process through site investigation foundation selection and finally design The book includes chapters on many aspects of foundation engineering that most other books avoid including filled and contaminated sites mining and other man made conditions features a step by step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in this much neglected yet extremely economical foundation solution concentrates on foundations for building structures rather than the larger civil engineering foundations includes many innovative and economic solutions developed and used by the authors practice but not often covered in other publications provides an extensive series of appendices as a valuable reference source For the Second Edition the chapter on contaminated and derelict sites has been updated to take account of the latest guidelines on the subject including BS 10175 Elsewhere throughout the book references have been updated to take account of the latest technical publications and relevant British Standards

Resilience and the Behavior of Large-Scale Systems Lance H. Gunderson, Lowell Pritchard, 2012-06-22

Scientists and researchers concerned with the behavior of large ecosystems have focused in recent years on the concept of resilience Traditional perspectives held that ecological systems exist close to a steady state and resilience is the ability of the system to return rapidly to that state following perturbation However beginning with the work of C S Holling in the early 1970s researchers began to look at conditions far from the steady state where instabilities can cause a system to shift into an entirely different regime of behavior and where resilience is measured by the magnitude of disturbance that can be absorbed before the system is restructured Resilience and the Behavior of Large Scale Systems examines theories of resilience and change offering readers a thorough understanding of how the properties of ecological resilience and human adaptability interact in complex regional scale systems The book addresses the theoretical concepts of resilience and stability in large scale ecosystems as well as the empirical application of those concepts in a diverse set of cases In addition it discusses the practical implications of the new theoretical approaches and their role in the sustainability of human modified ecosystems The book begins with a review of key properties of complex adaptive systems that contribute to overall resilience including multiple equilibria complexity self organization at multiple scales and order it also presents a set of mathematical metaphors to describe and deepen the reader s understanding of the ideas being discussed Following the introduction are case studies that explore the biophysical dimensions of resilience in both terrestrial and aquatic systems and evaluate the propositions presented in the introductory chapters The book concludes with a synthesis section that revisits propositions in light of the case studies while an appendix presents a detailed account of the relationship between return times for a disturbed system and its resilienc In addition to the editors contributors include Stephen R Carpenter Carl Folke C S Holling Bengt Owe Jansson Donald Ludwig Ariel Lugo Tim R McClanahan Garry D Peterson and Brian H Walker
