Rainbow Route An Illustrated History:

The Rainbow Route Robert Evan Sloan, Carl A. Skowronski, 1984 **Ouray** Gail Zanett Saunders, Maria Jones, 2010

Situated in a spectacular basin surrounded by 13 000 foot peaks the city of Ouray has captured the eye of adventurers from its beginnings while the glitter of gold and silver brought prospectors to its mountains The Uncompahgre Utes hunted and soaked in their sacred hot springs for generations but about one year after Chief Ouray's death they were removed from their homelands to a reservation in Utah Mines and mining camps proliferated in the harsh remote high country where rugged terrain hampered the transportation of ore and supplies even after toll roads and railroads lessened isolation Ouray pronounced Yurr AY developed into a Victorian community with families churches and schools contrasted with rowdy saloons and so called fancy ladies Ouray further embraced tourism after mining waned and heritage preservation remains an ongoing concern **U.S. Geological Survey Professional Paper** S. E. Church, Paul Von Guerard, Susan E. Finger, 1984 **Riding**

the High Wire Robert A. Trennert, 2001-08-15 Riding the High Wire is the first comprehensive history of aerial mine tramways in the American West describing their place in the evolution of mining after 1870 Robert A Trennert shows how the mid nineteenth century development of wire rope manufacturing made it possible for American entrepreneurs such as Andrew S Hallidie and Charles Huson to begin erecting single rope tramways in the 1870s and 1880s Their inventions were followed by the more substantial double rope systems imported from Europe By the turn of the century aerial tramways were common throughout western mining regions hauling everything from gold and silver ore to coal and salt and changing the face of the industry Aerial mine tramways proved to have a special fascination people often rode them for a thrill sometimes with disastrous results They were also very temperamental needed constant attention and were prone to accidents The years between 1900 and 1920 saw the operation of some of the west's most spectacular tramways but the decline in high country mining beginning in the 1920s coupled with the development of more efficient means of transportation made this technology all but obsolete by the end of the Second World War Historians and the general reader will be equally enthralled by Trennert's fascinating story of the rise and fall of aerial mine tramways Professor Trennert has explored a new area of mining history and is to be commended for his pioneering work Liston Leyendecker author of The Griffith Family and the Founding of Georgetown
