Rhetoric Of Risk Technical Documentation In Hazardous Environments:

The Rhetoric of Risk Beverly A. Sauer, 2003-01-30 This volume examines rhetorical practices relating to situations of risk and how documents and communication succeed or fail in these contexts For scholars in technical communication rhetoric and related areas

The Rhetoric of Risk Beverly A. Sauer, 2003-01-30 The crash of an Amtrak train near Baltimore the collapse of the Hyatt hotel in Kansas City the incident at Three Mile Island and other large scale technological disasters have provided powerful examples of the ways that communication practices influence the events and decisions that precipitate a disaster These examples have raised ethical questions about the responsibility of writers within agencies epistemological questions about the nature of representation in science and rhetorical questions about the nature of expertise and experience as grounds for judgments about risk In *The Rhetoric of Risk Technical Documentation in Hazardous Environments* author Beverly Sauer examines how the dynamic uncertainty of the material environment affects communication in large regulatory industries Sauer's analysis focuses specifically on mine safety which provides a rich technical and historical context where problems of rhetorical agency narrative and the negotiation of meaning have visible and tragic outcomes But the questions Sauer asks have larger implication for risk and safety How does writing function in large regulatory industries What can we learn from experience Why is this experience so difficult to capture in writing What information is lost when agencies rely on written documentation alone Given the uncertainties how can we work to improve communication in hazardous and uncertain environments By exploring how individuals make sense of the material technical and institutional indeterminacies of their work in speech and gesture *The Rhetoric of Risk* helps communicators rethink their frequently unquestioned assumptions about workplace discourse and the role of writers in hazardous worksites It is intended for scholars and students in technical writing and communication rhetoric risk analysis and risk communication as well as a wide range of engineering and technical fields concerned with risk safety and uncertainty

Being at Genetic Risk Kelly Pender, 2018-10-04 Rhetorics of choice have dominated the biosocial discourses surrounding BRCA risk for decades telling women at genetic risk for breast and ovarian cancers that they are free to choose how and whether to deal with their risk Critics argue that women at genetic risk are in fact not free to choose but rather are forced to make particular choices In *Being at Genetic Risk* Kelly Pender argues for a change in the conversation around genetic risk that focuses less on choice and more on care *Being at Genetic Risk* offers a new set of conceptual starting points for understanding what is at stake with a BRCA diagnosis and what the focus on choice obstructs from view Through a praxiographic reading of the medical practices associated with BRCA risk Pender's analysis shows that genetic risk is not just something BRCA women know but also something that they do It is through this doing that genetic cancer risk becomes a reality in their lives one that we can explain but not one that we can explain away Well researched and thoughtfully argued *Being at Genetic Risk* will be welcomed by scholars of rhetoric and communication particularly those who work in the rhetoric of science technology and medicine as well as scholars in allied fields who study the social ethical and political implications of genetic medicine Pender's insight will also be of interest to organizations that advocate for those at genetic risk of breast and ovarian cancers

Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed

Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks

Negotiated Risks Rudolf Avenhaus,Gunnar

Sjöstedt,2009-04-28 The International Institute for Applied Systems Analysis IIASA has had risk as a research topic on its agenda right from its inception in 1972 Risk has played a jor role in the Energy Program with research being carried out both in house and in cooperationwith other internationalinstitutions like the InternationalAtomic ergy Agency IAEA and national research centers Research areas were primarily the evaluationof all possible risks within one categoryof energysupply like nuclear ssion or fusion or fossil fuels and even more important the comparisonof risks of different energy supplystrategies Later on an independent program was started which still exists today under the name Risk and Vulnerability There is a large amount of literature on risks to which IIASA s research programs have contributed signi cantly over the years and there is of course an abundance of published work on international negotiations part of which is a result of the work of the Processes of

International Negotiation PIN Program There are however so far no studies on the combination of these two strands
Therefore and as research on both topics is housed at IIASA we are happy that our PIN Program has undertaken the dif cult
and important task of analyzing what the editors of this book have called negotiated risks
