The Robots are Here Alvin Silverstein, Virginia B. Silverstein, 1983 Describes various kinds of robots and their uses and considers the relationship of robots and humans and the implications of a world increasingly run by robots *New Technical Books* New York Public Library, 1978

Personal Robot Navigator Merl K. Miller, Nels Winkless, Joe Bosworth, 1998 The Personal Robot Navigator is a book and software combination that presents the world of personal robot navigation how robots can find their way around our homes and offices The RoboNavr Simulation software included with the book enables you the robotmaster to establish a map for each room in your house place furniture in the room just as it is arranged in real life record navigation corridors for where the robot can travel automatically calculate the best path from and to points in the room simulate the robot following the path while monitoring the compass sonar wheel turn and triangulation indicators on a sensor control panel freeze the action and print the screen and study the navigation log created by the robot

Rule of the Robots Martin Ford, 2011-09-14 The New York Times bestselling author of Rise of the Robots shows what happens as AI takes over our lives If you have a smartphone you have AI in your pocket AI is impossible to avoid online And it has already changed everything from how doctors diagnose disease to how you interact with friends or read the news But in Rule of the Robots Martin Ford argues that the true revolution is yet to come In this sequel to his prescient New York Times bestseller Rise of the Robots Ford presents us with a striking vision of the very near future He argues that AI is a uniquely powerful technology that is altering every dimension of human life often for the better For example advanced science is being done by machines solving devilish problems in molecular biology that humans could not and AI can help us fight climate change or the next pandemic It also has a capacity for profound harm Deep fakes AI generated audio or video of events that never happened are poised to cause havoc throughout society AI empowers authoritarian regimes like China with unprecedented mechanisms for social control And AI can be deeply biased learning bigoted attitudes from us and perpetuating them In short this is not a technology to simply embrace or let others worry about The machines are coming and they won't stop and each of us needs

to know what that means if we are to thrive in the twenty first century And Rule of the Robots is the essential guide to all of it both AI and the future of our economy our politics our lives **50 in 50** Harry Harrison,2001-06-02 Presents a retrospective collection of fifty short stories accompanied by notes and introductory material on the author s work **Duty Free Art** Hito Steyerl,2017-10-03 In Duty Free Art filmmaker and writer Hito Steyerl wonders how we can appreciate or even make art in the present age What can we do when arms manufacturers sponsor museums and some of the world s most valuable artworks are used as a fictional currency in a global futures market that has nothing to do with the work itself Can we distinguish between creativity and the digital white noise that bombards our everyday lives Exploring artefacts as diverse as video games Wikileaks files the proliferation of spam and political actions she exposes the paradoxes within globalization political economies visual culture and the status of art production *Frankenstein and Philosophy* Nicolas Michaud,2013-10-15 Mary Shelley s novel Frankenstein The Modern Prometheus sparked into life a fascination with science gone awry that refuses to die From 1818 to present day Hollywood the story of Victor Frankenstein and his reanimated stitched together corpse has inspired some would say the very idea of modern science fiction and countless essays movies novels songs comic books and TV shows aiming to capture what was right wrong abominable inevitable scary or funny in this classic tale Can organic life be reanimated using electricity or genetic manipulation If so could Frankenstein s monster really teach itself to read and speak as Mary Shelley imagined Do monsters have rights or responsibilities to those who would as soon kill them What is it about music that so affects Frankenstein s monster or any of us What does Mel Brook s Frau Blucher say to contemporary eco feminism Why are some Frankenstein s flops and others historic successes Is there a true Frankenstein Why are children but not adults drawn to Shelley s monster And what is a monster anyways Frankenstein and Philosophy brings 25 philosophers to stitch together these and other questions as they apply the history of philosophy to history s greatest horror franchise Some chapters treat the Frankenstein films others the original novel and yet others the many comic books novels and modern adaptations Together they pay tribute to perhaps the most enduring pop culture icon and the fundamental fears hopes questions and puzzles it raises **The Long History of the Future** Nicole Kobie,2024-07-04 We love to imagine the future But why are groundbreaking future technologies always just around the corner and never a reality For decades we ve delighted in dreaming about a sci fi utopia from flying cars and bionic humans to hyperloops and smart cities And why not Building a better world be it a free flying commute or an automated urban lifestyle is a worthy dream Given the pace of technological change nothing seems impossible anymore But why are these innovations always out of reach Delving into the remarkable history of technology The Long History of the Future introduces us to the clever scientists genius engineers and eccentric innovators who first brought these ideas to life and have struggled to make them work since These stories reveal a more realistic picture of how these technologies may evolve and how we ll eventually get to use them You may never be able to buy a fully driverless car but automated braking and steering could

slash collision rates Smart cities won't perfect city life but they could help empty bins on time Hyperloops may never arrive but superfast trains are already here We always believe current technology is the best it could be By looking to the past and the future Nicole Kobie shows how history always proves us wrong and how what lies ahead may not be what we imagine but so much better

Making Simple Robots Kathy Ceceri, 2015-02-19 Making Simple Robots is based on one idea Anybody can build a robot That includes kids school teachers parents and non engineers If you can knit sew or fold a flat piece of paper into a box you can build a no tech robotic part If you can use a hot glue gun you can learn to solder basic electronics into a low tech robot that reacts to its environment And if you can figure out how to use the apps on your smart phone you can learn enough programming to communicate with a simple robot Written in language that non engineers can understand Making Simple Robots helps beginners move beyond basic craft skills and materials to the latest products and tools being used by artists and inventors Find out how to animate folded paper origami design a versatile robot wheel leg for 3D printing or program a rag doll to blink its cyborg eye Each project includes step by step directions as well as clear diagrams and photographs And every chapter offers suggestions for modifying and expanding the projects so that you can return to the projects again and again as your skill set grows

Insidious Michael McCloskey, 2010-12-07 Leaked stories of strange new rules and codes of behavior indicate something's gone sour in the deep space retreats of the superrich corporate execs Some say that it's only the eccentricities of the powerful leaders of capitalistic society But others speak of dark twisted rituals human slavery and illegal experiments in banned technologies Bren Marcken is a robot handler and strategist on a special team of the United Nations Space Force formed to occupy the corporate space stations and seize their technological secrets To accomplish the mission he's been authorized to field artificial intelligences that he considers just as dangerous as the enemy Chris Adrastus is an aggressive young executive whose careful machinations have carried him to a high position at the powerful European Union company Vineaux Genomix Instead of finding satisfaction he's become disillusioned with what he discovers at the top of the executive world Aldriena Niachi is a covert operative of Black Core a Brazilian software company with a global sphere of influence She's about to find out what Black Core will do for a technological lead Do some kinds of knowledge come at inordinate cost even for a supercorporation
