Dynamics in Human and Primate Societies Timothy A. Kohler, George J. Gumerman, 2000 With an emphasis on small scale societies in an effort to maximize realism in the modeling efforts applied to social evolution this volume is an important step toward an actor oriented cross disciplinary approach to

understanding human behavior over time **The Pursuit of Ecotopia** E. N. Anderson, 2010-01-22 The world environmental and social justice crises brought on by our high throughput global economy can be ameliorated only if we adapt the pragmatic ethics of social cohesion in traditional societies to the modern world Traditional societies have much to teach the modern world about conservation and environmental management The Pursuit of Ecotopia Lessons from Indigenous and Traditional Societies for the Human Ecology of Our Modern World argues that the root of our environmental crisis is that we have not devised modern ways to induce people with diverse interests to think and act cooperatively to secure shared interests We take a short term narrow view of resource management and ethical conduct instead of a long term global view of ecotopia a conception in which the destructive corollaries of consumerism are curbed by emotionally grounded policies and ethics of sustainability social justice and stewardship In this controversial and brilliantly written book author E N Anderson maintains that the world can escape impending ecological disaster only by embracing a political and ethical transformation that will imbue modern societies with the same shared sense of emotional rationality practiced by traditional cultures He draws lessons from ecologically successful traditional societies and also draws cautionary tales from traditional societies that have responded maladaptively to disruption and failed ecologically as a result **Dimensions of Sustainable Development - Volume I** Kamaljit S. Bawa , Reinmar Seidler, 2009-11-26 Dimensions of Sustainable Development is the component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Dimensions of Sustainable Development in two volumes deals with the diversity of points of view on this complex subject The chapters in these volumes are organized into five groups The first starts with chapters introducing the general concepts underlying sustainable development The second treats current and emerging understandings of the general biophysical limits of economic growth and development The third focuses on the human and social capital requirements for sustainability The fourth deals with a particular aspect of the organization of human economic and technological activity The final group discusses something of the diversity of possible approaches to the management of sustainability These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
