*Birdwatching in 100 Objects* David Callahan, 2014-08-14 This book looks at 100 items that have profoundly shaped how people watched, studied, and engaged with the avian world. Each item contains around 500 words on a double-page spread and includes an illustration of the object in question. The book includes the objects listed below as well as many more. The range of items is international and cross-cultural. Subjects include: An Egyptian field guide, early tomb decorations of birds identifiable as species, *Ornithologiae libri tres*, the first British bird guide, a 1676 publication that attempted to itemise all British birds known at the time, The Dodo specimen held at the Horniman Museum, *Systema Naturae* by Carl Linnaeus, the first ever system of scientific names in 1758 and still the international standard today, The shotgun, The book, The Natural History and Antiquities of Selborne by Gilbert White, 1789, HMS Beagle, the ship on which Darwin made his ground-breaking discoveries, Aluminium bird rings used to record movement and longevity of individuals and species. Along with many more modern innovations including walkie-talkies, pagers, radio tags, and apps.

**Birders of Africa** Nancy J. Jacobs, 2016-04-26 In this unique and unprecedented study of birding in Africa, historian Nancy Jacobs reconstructs the collaborations between well-known ornithologists and the largely forgotten guides, hunters, and taxidermists who worked with them. Drawing on ethnography, scientific publications, private archives, and interviews, Jacobs asks: How did white ornithologists both depend on and operate distinctively from African birders? What investment did African birders have in collaborating with ornithologists? By distilling the interactions between European science and African vernacular knowledge, this stunningly illustrated work offers a fascinating examination of the colonial and postcolonial politics of expertise about nature.

*Birders* Mark Cocker, 2003-02-27 Journalist Cocker is a member of a community of fanatics who watch birds. Now he offers what *The Baltimore Sun* calls the most graceful, respectful, and technically rich book on this fascination.

**Backpacker**, 1974 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. *In the Field, Among the Feathered* Thomas R. Dunlap, 2011-12-01 America is a nation of ardent, knowledgeable birdwatchers. But how did it become so? And what role did the field guide play in our passion for spotting, watching, and describing birds? *In the Field, Among the Feathered* tells the history of field guides to birds in America from the Victorian era to the present, relating changes in the guides to shifts in science, the craft of field identification, and new technologies for the mass reproduction of images. Drawing on his experience as a passionate birder and on a wealth of archival research, Thomas Dunlap shows how the twin pursuits of recreation and conservation have inspired birders and how field guides have served as the preferred method of informal education about nature for well over a century. The book begins with the first generation of late 19th-century birdwatchers who built the hobby when opera glasses

were often the best available optics and bird identification was sketchy at best As America became increasingly urban birding became more attractive and with Roger Tory Peterson's first field guide in 1934 birding grew in both popularity and accuracy By the 1960s recreational birders were attaining new levels of expertise even as the environmental movement made birding's other pole conservation a matter of human health and planetary survival Dunlap concludes by showing how recreation and conservation have reached a new balance in the last 40 years as scientists have increasingly turned to amateurs whose expertise had been honed by the new guides to gather the data they need to support habitat preservation Putting nature lovers and citizen activists at the heart of his work Thomas Dunlap offers an entertaining history of America's long standing love affair with birds and with the books that have guided and informed their enthusiasm *Jim Burns' Arizona Birds* Jim Burns, 2008-05-08 *Jim Burns Arizona Birds* is a portrayal of the habits and habitats of seventy five of these unique southwestern species Birdwatchers new to the game will find a wealth of knowledge on and insight into some familiar favorites as well as all idea of what it takes to accomplish more uncommon sightings Veteran birders will appreciate Burns' unique incorporation of natural history and other details beyond the usual taxonomic data and will enjoy reminders of their own triumphs and heartbreaks in his colorful personal accounts of vehicular breakdowns photographic faux pas and egregious identification errors in the field *Birding Guide to Forsyth County, North Carolina* David K. Disher, 2010-08-22 The *Birding Guide to Forsyth County* contains graphs that show the birder or nature lover which species of birds can be seen in the county for each week of the year The guide also includes a comprehensive guide to the bird watching locations in Forsyth and nearby counties Also included are birding basics for beginning bird watchers **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff, R R Bowker Publishing, 1996-09 *Bird Watcher's Digest Butterflies Backyard Guide* Erin Gettler, 2017-02-15 Learn to identify the butterflies you see and find out what to plant in your garden so they visit you at home Butterflies are likely the most popular insects in the entire insect class With their large brightly colored wings and beneficial pollinator roles in the ecosystem it's no wonder they have such a big fan base amongst their human observers Now for anyone who's ever wondered which exact butterfly it is that they're admiring there's a resource with all the answers the *Butterflies Backyard Guide* Replete with more than 50 of the most common butterflies in North America the book is a fully illustrated guide that makes it easy to identify these fragile winged insects You will find within Each butterfly in the book is presented on a two page spread with images and facts about the butterfly as well as tips for what you can plant in order to attract that particular butterfly to visit your backyard Other information provided for each butterfly includes size lifespan habitat diet range predators and reproduction The guide is organized by major butterfly type so you can easily flip open the guide and zero in on the facts about the specific butterfly you're identifying Keep this guide close at hand for a quick analysis of the iridescent butterflies you see floating from flower to flower You'll be pointing out Monarchs Eastern Tiger Swallowtails and Common Buckeyes before you know it
