

5 STAGES OF RECOVERY

1

RECOVERY CONTEMPLATION (PRE-ABSTINENCE)

During this stage the individual acknowledges that there is a problem and begins to consider reaching out for help to curb the addiction. This stage of the recovery process can go on for some time with the individual wavering between the pre-contemplation, contemplation and preparation stages of change.

2

DETOX AND EARLY ABSTINENCE (0 TO 2-3 MONTHS)

During this stage the individual actually stops using their drug of choice. This stage can be excruciating for many and may require medical supervision for the first week to ten days. This stage is characterized by the body's detoxification of mind and mood altering substances. It is this stage where the body begins to heal itself and return to homeostasis.

3

TREATMENT AND EARLY RECOVERY (2-3 MO TO 1 YR)

This is the core of any recovery program however it should not begin too early. This stage typically begins with residential treatment or another intensive therapy such as one-on-one counseling. Intensive self-examination combined with clinical support helps the addict identify and expose the underlying issues that manifested into their addiction.

4

ACTIVE RECOVERY & MAINTENANCE (1 TO 5 YEARS)

The focus of this stage is the incorporation of everything learnt into one's daily life. The individual has completed extensive work on themselves and begun a complete transformation of their lives (mind, body and spirit) including new tools to cope and to guard against relapse.

5

ADVANCED RECOVERY (5 YEARS AND BEYOND)

With at least 5 years of clean time, the individual's program has evolved into a living and almost subconscious one. The tools that they have learnt become second nature and get used every day without effort. The individual is very comfortable in their new identity and purposefully lives a wholehearted and authentic life.

presents in *The Addiction Recovery Handbook* Understanding Addiction and Culture is long overdue Since 1939 Bill Wilson's
important and influential books *Alcoholics Anonymous* and *AA's Twelve Steps and Twelve Traditions* have helped millions of
people struggling with addiction to recover In more than 80 years since then a lot has changed the definition of addiction its
demographics social attitudes to addiction politics religious influence treatment modalities and the epidemiology of the
illness These have taken tolls on our modern network of relationships and treatment that culture and community now depend
upon *The Addiction Recovery Handbook* examines the changing historical views of addiction outlines how this culture
developed its contemporary perceptions and values and how society contributes to this growing problem Richard Clark
proposes AA's traditional religious model of God's help and forgiveness can no longer address the needs of a diverse and
largely irreligious society where atheism is becoming mainstream His updated analysis of the traditional AA approach
proposes that self understanding and awareness through knowledge and education psychology and compassion be the
significant components of any recovery framework This will guide both caregivers and addicts to develop expertise regarding
more successful treatment and recovery protocols This would be in a supportive environment of self knowledge and mutual
respect whether theist or atheist All concerned will acquire the ability to live a spiritual life which is clearly defined *The
Addiction Recovery Handbook* is an interesting and readable book and is intended for everyone addicts medical professionals
counsellors therapists clients sponsors social workers family members partners friends employers every stakeholder in a
healthy non judgmental society that cares about the wellbeing of all its members [The Mindful Path to Addiction Recovery](#)
Lawrence Peltz, 2013-03-12 Mindfulness the quality of attention that combines full awareness with acceptance of each
moment just as it is is gaining broad acceptance among mental health professionals as an adjunct to treatment Because at
the heart of addiction is the fear of painful emotional states addicts compulsively seek drugs and alcohol to avoid or escape
emotional pain Mindfulness on the other hand helps us develop greater acceptance and ease with life's challenges as well as
greater self compassion Here Dr Lawrence Peltz who has worked as an addiction psychiatrist for more than two decades
draws from his clinical experience and on the techniques of mindfulness based stress reduction MBSR to explain the
fundamental dynamics of addiction and the stages of the recovery process and also gives us specific mindfulness exercises to
support recovery
