Misperceptions of the Social World Eric Beasley, 2018-01-02

This volume elucidates some of the very concrete ways in which Americans misperceive the social world and how we are all subject to biases and illusions. As such, it challenges the assumption in much social science theorizing that people are rational actors by exploring how the machinations of cognition, the effect of our past experiences, the news, and social media feeds all factor into our opinion-making process. The chapters highlight common and often incorrect perceptions of population diversity, sexual behavior, the economy, health, and relationships. It shows how correcting these misperceptions of the social world can lead to real behavioral and attitudinal change. Frontline Policing in the 21st Century Sheldon F. Greenberg, 2017-11-29

Webster, Emma Goodall, Susannah Rowland, 2019-01-01

This book presents a unique exploration of common myths about autism by examining these myths through the perspectives of autistic individuals. Examining the history of attitudes and beliefs about autism and autistic people, this book highlights the ways that these beliefs are continuing to impact autistic individuals and their families and offers insights as to how viewing these myths from an autistic perspective can facilitate the transformation of these myths into a more positive direction. From savant syndrome to the conception that people with autism lack empathy, each chapter examines a different social myth, tracing its origins, highlighting the implications it has had for autistic individuals and their families, debunking misconceptions, and reconstructing the myth with recommendations for current and future practice. By offering an alternative view of autistic individuals as competent and capable of constructing their own futures, this book offers researchers, practitioners, individuals, and families a deeper, more accurate, more comprehensive understanding of prevalent views about the abilities of autistic
