Naming The Whirlwind Renewal Of God Lang:

Naming the Whirlwind Langdon Gilkey, 1976 **Naming the Whirlwind** Langdon Brown Gilkey, 1969 **The Quest for Plausible Christian Discourse in a World of Pluralities** Younhee Kim, 2008 This book critically examines David Tracy's well known methodology of fundamental theology namely his revisionist model as developed in his *Blessed Rage for Order* 1975 together with his methodological shifts through the 1980s 1990s and early 2000s It explores how successful he has been in constructing a methodology for the public theological discourse that he deems so necessary More particularly this book asks how serviceable this methodology is for articulating Christian discourse in an intelligible and public way in the contemporary context of religious plurality Very Sure of God: Religious Language in the Poetry of Robert Browning E. LeRoy Lawson, 1974 Lawson asserts that simplicity economy rather than complexity characterize Brownings faith *Echoes of Coinherence* W. Ross Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology Karl Rahner Karen Kilby, 2004-02-24 Karl Rahner is one of the great theologians of the twentieth century known for his systematic foundationalist approach This bold and original book explores the relationship between his theology and his philosophy and argues for the possibility of a nonfoundationalist reading of Rahner Karen Kilby calls into question both the admiration of Rahner's disciples for the overarching unity of his thought and the too easy dismissals of critics who object to his flawed philosophical starting point or to his supposedly modern and liberal appeal to experience Through a lucid and critical exposition of key texts including *Spirit in the World* and *Hearer of the Word* and of themes such as the *Vorgriff auf esse* the supernatural existential and the anonymous Christian Karen Kilby reaffirms Rahner's significance for modern theology and offers a clear exposition of his thought **The Doctrine of God in African Christian Thought** James Henry Owino Kombo, 2007-05-30 The Christian faith knows and worships one God who is revealed in the Son and in the Holy Spirit This is the meaning of the doctrine of the Trinity in Christian thought Although Christian orthodoxy defines the doctrine of the

Trinity the intellectual tools used to capture it significantly vary At different times and in different places Western Christianity has for instance used neo Platonism German Idealism and the conceptual tools of the second century Greeks Taking elements from the known African intellectual framework this book argues that for African Christians the respective pre Christian African understanding of God and the Ntu metaphysics in particular function as conceptual gates for an attempt towards articulating the Trinity for African Christian audiences The Making of American Liberal Theology Gary J. Dorrien,2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom *CCAR Journal* Central Conference of American Rabbis,1971 The Vigilant God Horton Davies,1992 The aim of this book will be to review and to re assess the Augustinian Thomist Calvinist and Barthian doctrines of providence in the light of their intentions and in the perspective of the twentieth century interpretation of providence We shall begin with a consideration of the Biblical doctrine of providence which all four theologians believed they were interpreting All thought that God watches over his own as Psalm 121 indicated Behold He who keeps Israel will neither slumber nor sleep Hence the title of this book The vigilant God Introduction
