Naming Of Persons:

The Naming of Persons Paul Tournier,1975 **Menkiti on Community and Becoming a Person** Edwin

Etieyibo, Polycarp Ikuenobe, 2020-07-24 Ifeanyi Menkiti's articulation of an African conception of personhood especially in Person and Community in African Traditional Thought has become very influential in African philosophy. Menkiti on Community and Becoming a Person contributes to the debate in African philosophy on personhood by engaging with various aspects of Menkiti's account of person and community. The contributors examine this account in relation to themes such as individualism, communalism, rights, individual liberty, moral agency, communal ethics, education, state and nation building, elderhood and ancestorhood. Through these themes, this book edited by Edwin Etieyibo and Polycarp Ikuenobe shows that Menkiti's account of personhood in the context of community is both fundamental and foundational to epistemological, metaphysical, logical, ethical, legal, social and political issues in African thought systems.

Models and Methods in Social Network Analysis Peter J. Carrington, John Scott, Stanley Wasserman, 2005-02-07 Models and Methods in Social Network Analysis first published in 2005 presents the most important developments in quantitative models and methods for analyzing social network data that have appeared during the 1990s. Intended as a complement to Wasserman and Faust's Social Network Analysis: Methods and Applications, it is a collection of articles by leading methodologists reviewing advances in their particular areas of network methods. Reviewed are advances in network measurement, network sampling, the analysis of centrality, positional analysis or blockmodelling, the analysis of diffusion through networks, the analysis of affiliation or two mode networks, the theory of random graphs, dependence graphs, exponential families of random graphs, the analysis of longitudinal network data, graphical techniques for exploring network data, and software for the analysis of social networks.

Names and Naming Guy Puzey, Laura Kostanski, 2016-02-02 This book explores international trends in naming and contributes to the growing field of onomastic enquiry. Naming practices are viewed here through a critical lens, demonstrating a high level of political and social engagement in relation to how we name people and places. The contributors to this publication examine why names are not only symbols of a person or place but also manifestations of cultural, linguistic and social heritage in their own right. Presenting analyses of geographically and culturally diverse perspectives and case studies, the book investigates how names can represent deeper kinds of identity, act as objects of attachment and dependence, and reflect community mores and social customs while functioning as powerful mechanisms of inclusion and exclusion. The book will be of interest to researchers in onomastics, sociology, human geography, linguistics and history.
