Castillo, 2012-02-01 What would American literature look like in languages other than English and what would Latin American literature look like if we understood the United States to be a Latin American country and took seriously the work by U S Latinos as in Spanish Debra A Castillo explores these questions by highlighting the contributions of Latinos as writing in Spanish and Spanglish Beginning with the anonymously published 1826 novel *Jicotncal* and ending with fiction published at the turn of the twenty first century the book details both the characters and authors struggles with how to define an American self Writers from Cuba Puerto Rico and Mexico are featured prominently alongside a sampling of those writers from other Latin American heritages Peru Colombia Chile Castillo concludes by offering some thoughts on U S curricular practice *Postcolonial*

Literatures of Climate Change, 2022-07-04 Postcolonial Literatures of Climate Change investigates the evolving nature of postcolonial literary criticism in response to global regional and local environmental transformations brought about by climate change. It builds upon and extends previous studies in postcolonial ecocriticism to demonstrate how the growing awareness of human caused global warming has begun to permeate literary consciousness praxis and analysis. The breadth of the volume's coverage of the diversity of its focal locations, cultures, genres, and texts serves as a salient reminder that while climate change is global, its impacts vary, affecting peoples from place to place unequally and often in accordance with their particular historical experience of colonialism and neo colonialism as well as their ongoing marginalisations. Demonstrating the urgency of invoking novel epistemological approaches combining the scientific and the imaginative, this book is a must read for those concerned about the present and potential impacts of climate change on formerly colonised areas of the world. The comprehensive and illuminating Introduction offers a crucial history and current state of postcolonial ecocriticism as it has been and is addressing climate crises. Helen Tiffin, University of Wollongong. The broad focus on the polar regions, the Pacific and the Caribbean, with added essays on environmental justice activism in India and Egypt, opens up rich terrain for examination under the rubric of postcolonial and ecocritical analysis, not only expanding recent studies in this field but also enabling new comparisons and conceptual linkages. Helen Gilbert, Royal Holloway, University of London. The subject is topical and vital and will become even more so as the problem of how to reconcile the demands of climate change with the effects on regions and individual nations already damaged by the economic effects of colonisation and the subsequent inequalities resulting from neo colonialism continues to grow. Gareth Griffiths, Em Prof, University of Western Australia. Strangers on Familiar Soil, Edward Dallam Melillo, 2015-10-20. This groundbreaking history explores the many unrecognized enduring linkages between the state of California and the country of Chile. The book begins in 1786 when a French expedition brought the potato from Chile to California and it concludes with Chilean president Michelle Bachelet's diplomatic visit to the Golden State in 2008. During the intervening centuries, new crops, foods, fertilizers, mining technologies, laborers, and ideas from Chile radically altered California's development. In turn, Californian systems of servitude, exotic species, educational programs, and capitalist development strategies dramatically shaped Chilean history. Edward Dallam Melillo develops a new set of historical perspectives, tracing eastward moving trends in U.S. history, uncovering South American influences on North America's development, and reframing the Western Hemisphere from a Pacific vantage point. His innovative approach yields transnational insights and recovers long forgotten connections between the peoples and ecosystems of Chile and California.

Antarctica in Fiction, Elizabeth Leane, 2012-06-29. This first comprehensive exploration of literary responses to Antarctica maps the far south as a space of the imagination. *Handbook on the Politics of Antarctica*, Klaus Dodds, Alan D. Hemmings, Peder Roberts, 2017-01-27. The Antarctic and Southern Ocean are hotspots for contemporary endeavours to oversee the last frontier of the Earth. The Handbook on the Politics of Antarctica offers a wide ranging and comprehensive

overview of the governance geopolitics international law cultural studies and history of the region Four thematic sections take readers from the earliest human encounters to contemporary resource exploitation and climate change Written by leading experts the Handbook brings together the very best interdisciplinary social science and humanities scholarship on the Antarctic and Southern Ocean
